## EDITORIAL

6

This month's editorial sees the boy Jezza reveal all of the winners of the amazing Christmas competitions (for which, incidentally, we received around ten thousand entries). Is your line entry one of the winners? Turn to these pages and find out - NOW!

## NEWS

10

Amazing! Astounding! Astonishing! Once again, MEAN MACHINES has completely confounded its confused, clumsy cack-handed competitors with a red hot exclusive report from the Las Vegas CES Show.

## MEAN YOB

24

MEAN YOB returns with his bulbous brown neck literally brimming over with sad, dejected, doleful, grievous, pathetic, pitiable pieces of prose from you readers. Luckily, with the aid of spacial equipment, he's managed to locate a few interesting letters too (we hope).

## Q+A

30

Went to know when a new game is coming out for your console? Or if the Master System has a CD-ROM attachment coming out? Maybe you would like to know who'd win if Sonic and Alex Kidd decided to beat up Merio and Megaman (doh!). It's questions like these that you ask Julien "Jezza" Rignall. It's answers like the ones on page 30 and 31 that you receive.

## TIPS

32

This month's Tips Section is just so amazingly outstanding, you'll be drooling over the pages and edifying at their excellence. And why not, with mega guides on F-22 Intarceptor, Donald Duck and Marble Madness as well as the usual avalanche of groovy little tips.

## CHARTS

78

These two pages are probably the most exciting in the magazine, because at great personal expense, we have sought to compile THE most definitive list of top-selling games on the shelves at the moment. Amazing.

MEAN MACHINES 4

## AMERICAN FOOTBALL SPECIAL

86

Just in time for the Superbowl, MEAN MACHINES provides you with the definitive comparison of the top console American Football games! So, if you're at all interested in funny encephalitis, these pages are the ones for you.

## THE HOTLINES 94

Once more, the MEAN MACHINES management have dug deep into their pockets to cough up the necessary cash required to get hold of the latest console gear. What's more, they're literally giving it all away in the fabulous 'phone-in' competitions. Turn to this page and ready yourself for some bowel-explosively exciting stuff.

## MEGAMART 115

For the tiny sum of one of your English pounds sterling, YOU can advertise in the amazing MEAN MACHINES Megamart, the part of the magazine solely dedicated to the buying and selling needs of the international console community. Just think, you could get rid of YOUR aged, bungling, crippled, dilapidated Meeter System (just by using these pages!

## PREVIEWS 124

This month, we're treating you to four stunning pages of preview-related tomfoolery. As usual, we've included just about every amazing new game you can think of and some you can't, because we find out about everything before anyone else does.

## NEXT MONTH 145

If you're expecting amazing information on the very next issue of MEAN MACHINES, you could try looking at this page. Usually, that's a bit of a dead loss, but this month we're not spinning our chins, for indeed, there's news of a completely mega irreble coming your way soon! Not surprisingly, it's MEGA!

 (C) MEAN MACHINES 1992

Any copying, transmitting or reproduction of this magazine without the express permission of the publishers will result in court action, monetary and much legal fee expeditiously repaid for the guilty party. We do not smooch your face in.

COMPETITION RULES  
 (MAP in game employees or their immediate family) are allowed to enter any of our comps, because it would be unfair if they did. Dwayne Milton of West Hamwood and his family can't enter either, because they don't laugh at this joke. What's the definition of a skeleton? A leper is a wind tunnel.

JAZZA'S FINAL BIT  
 We'll enter much satisfaction. I've decided that the alternative Christmas card winner was David Milton of Salfray Wagon, Essex the relation to Dwayne Milton. I hope his line effort really made me laugh. But the only problem is that it's a one-of-a-kind thing, so I can't print it. Well, I could, but I'd have to print it, rather than watch it and the obscene publication speed become upon my monkey ass.

JAZ

We're feeling a bit pleased with ourselves at the moment. The MEAN MACHINES Christmas Special sold over 100,000 copies, making it the biggest selling games magazine in Britain! Hurrah for us! But we're not going to rest on our laurels - we promise that MEAN MACHINES will get bigger and better, with more console coverage than any other magazine and even wilder free gifts!

And we've got something really spectacular lined up later this year! What is it? Stay tuned and you'll find out.

# EDITING

First of all, may I say thanks to everyone who entered the Christmas Special competitions. We had tens of thousands of entries - I've never seen so much post in my life (and Robert and George the mailmen certainly gave our ears a bit of a banding!). The quality of the entries was superb, and choosing a winner of each comp proved a difficult and arduous task, but at the end of the day, there can be only one winner (except in my competition, but then I'm hard) and here they are:

## JAZZA'S SUPER RUGBY SHIRT

Rugby shirt designs flooded in, with three times more entries than any of the other competitions! I spent two days opening them, and after much deliberation got the entries down to two - Barry Elliot of Rotherham (Super NES shirt) and Jeme Morgan of Leeds (Megadrive shirt). I still can't decide which is best, so I've decided to give a Super NES to each contestant. Am I generous or what? Commiserations to everyone else - there were some wonderful pictures, but in the end I decided to go for a design that could really be turned into a rugby shirt, as opposed to a t-shirt style design.

## BURGER ME SIDWAYS OZ!

The winner of burger fiend Osmond's competition was not only stunning, but also gave us something to think about. Instead of drawing a picture, Linda Walton (whose letter accompanying her winning Oz Burger appears in YOB's Mailbag this month) of Bury St Edmunds, Suffolk actually made a model - endy rugby brilliant it was too, tully deserving the first prize - Megadrive!

The Superjammies!

## GARY HARROD SAD CLOTHING DEBACLE

When we asked you to design a new outfit for friend of the tramps Gary Harrod, little did we know that we'd get a veritable Clothes Show of demented outfits - we could supply Vivian Westwood with ideas for years to come! Gary judged the competition himself, and decided that this strange costume should be the winner. "Scoopert Spoon" was sent in by Bradley Stew of Exhall, Coventry Yes, we know it's weird. But then again, what do you expect when the judge of the contest is a demented perv...

SADDER SPOON - PIONEER OF THE SPOONER IN GAMES AND BARRAGE OF THE JAZZ SHOW IN CREAMY RESULTS OF SHEEPY MAGNA.

SOOPER SPOON!

# DRAW!

## RAD'S SQUEAKY CLEAN COMP!

This was the most difficult comp of them all - putting coherent AND funny speech bubbles to a rather surreal and strange Radion Automatic cartoon. Many of the entries weren't coherent, even more of them weren't funny - but the one that excelled in both areas was sent in by S Broadbent of Bradford, W Yorks. His hilarious captions have won him a Game Gear and three games, which will be sent off post heste (whatever that means).

## RICHIE RICH PHONE BOOTH-O-RAMA!

Ah! Rich's naughty phone box jerry has become so well known that you if you went up to a hermit in the Gobi desert and said "Richard Leadbetter", he'd reply, "telephonic tomtoolery"! In tribute to the man's marvellous mouthpiece metarkay we asked you to design a phone box especially for him, and the finest one was sent in by Jos Anters of 4715 EK Rucphen, The Netherlands. Congratulations Jos! A Gembeyo and six games will soon be winging their way across the North Sea to you.

**JULIAN 'JAZZA' RIGNALL**  
When it comes to cooking, Jazza reckons his Chinese meals are the finest this side of Beijing. My Schazuan beef, spare ribs and sweet and sour pork are veritable oral orgasms\* reckon the quick-fry boy with the wok.  
**CURRENT FAVE GAMES: DESERT STRIKE, SUPER MARIO 4**

**RICHARD 'FRYIN' TONITE' LEADBETTER**  
When it comes to haute cuisine, Richard reckons his shepherd's pie is the world's best, even though he hasn't made one for five years! Other than that, the health conscious phone box fiend from Witham Town specialises in fry-ups and oven chips.  
**CURRENT FAVE GAMES: DESERT STRIKE, SUPER MARIO 4, ROBOCOQ**

**RAION 'SLICER' AUTOMATIC**  
Red's a bit of a dab hand with a spatula and frying pan and his chill hesh would warm the trousers of the most frozen Eskimo and fill the air with an aroma that you could cut with a knife.  
**CURRENT FAVE GAMES: FIGHTING MASTERS, SUPER MARIO 4, F1 CIRCUS**

**OZ 'COROON BLEUGH' BROWNE**  
Sadly, Oz is a demented baboon when it comes to nouvelle cuisine. Even if he was cooking for Janet Jackson, all he could possibly muster would be beans, sausage, bacon and chips - with a side plate of garlic bread for that added touch of sophistication.  
**CURRENT FAVE GAMES: THUNDER SPIRITS, F-ZERO, GHOULS 'N' GHOSTS**

**GARY 'CHICKEN' HARROD**  
Favourite amongst his tramp friends is the marvellous Gary Harrod chicken casserole special. "They just love the taste of that combination of vegetables, chicken with a fine sauce slowly cooked in a dry oven" says the lad himself.  
**CURRENT FAVE GAMES: ZELDA II, STREETFIGHTER II**

# CES SHOW

## GUNFORCE HITS SNES

Irem's brilliant arcade blaster Gunforce is currently being converted to the Super NES by Irem themselves. Featuring simultaneous two-player action and mind-boggling graphics, this looks like a shoot 'em up that shouldn't be missed.

## EXCLUSIVE SUPER NES SOCCER REPORT

After the mournful debacle they called Pro Soccer, the Super NES football scene is looking far more healthy these days. Nintendo have just announced that they've grabbed the rights to Human Corp's Super Formation Soccer and will be officially releasing the game in the UK later this year under the name of Super Soccer. Tallo are also entering the Super NES footballing scene with Super Soccer Champ, a souped-up conversion of the popular European Soccer Champ coin-op. And finally, Jaleco have decided to convert their festering football failure GOAL! to the SNES. Hopefully it'll bear no resemblance to the original Nintendo sad mockery of soccer and will be a totally all-new game. We'll tell you in when we have more information.

Microprose, famed for their computer simulations, are set to release plenty of amazing new products for the Nintendo, Super NES and Megadrive.

F-15 Strike Eagle II is one of the greatest PC flight sims ever, requiring the use of arcade skills along with flight sim abilities. This is scheduled for release on all three formats, although it's going to be called Super Strike Eagle on the SNES.

Railroad Tycoon is a Sim City-esque game, casting you as the founder of a railway system. It's your job to make sure that your rail system grows and prospers, rather than declines into a mournful, shambling debacle of locomotive "travel" like British Rail. Super NES and Megadrive versions should be available in the States later on this year.

Finally, Microprose have gone back to their roots by releasing a 16-bit version of one of their oldest simulators, Solo Flight. This is a non-combat simulator, concentrating on the joys of learning to fly. Only a Megadrive version has been confirmed, but a SNES version remains probable.

## AMERICAN GLADIATORS

Anyone who watches late-night TV must have seen the superb American Gladiators programme. It's a brilliant game show in which contestants battle the eponymous Gladiators in a series of very physical events. Gametek have grabbed the rights and are currently programming Super NES and Megadrive versions of the game. The SNES version was on display at the show and looks very impressive, with digitized graphics and effects and all the events from the TV series. Gametek have no UK release plans at present, but we'll keep on pestering them until they do!

# BLISTERING PACE

## SOCCER AT IT'S BEST.

- Fast - Realistic
- Fun to Play

**Nintendo®**

Each player on the pitch is an individual with a unique combination of skills and physical attributes.

Instinctive joystick controls to Pass, Dribble, Shoot, Head and Chip the ball or do a Sliding Tackle.

Curling Corner Kicks, controlled Throw Ins and Goal Kicks.

Injury and Extra Time. Red and Yellow Cards. Set Piece Free-Kicks and the famous AFTER TOUCH to let you bend, swerve and dip the ball. Plus a host of other options.

Cup, League and Euro Trophy Competitions with PENALTY SHOOT OUT.

**WILL BE**

**YOU RECKON  
NINTENDO  
HERE?**

Using all manner of cunning trickery and political manoeuvring, an evil Middle East dictator named General Kilbaba has successfully launched a military attack against a small neighbouring nation. Overwhelming the peaceful country with instruments of destruction, the inhabitants are ruthlessly hunted down and enslaved. Due to the tense political geography of the area, the United Nations are unable to take direct military action against the offending nation, but there is hope...

In between wheezing, collapsing and suffering various heart attacks, the US President devises a devious plan with which to remove the dictator and send his forces packing. Sending in a lone Apache helicopter gunship with a back-up support warship, the President believes that a short, sharp series of attacks should get the job done.

Operation Desert Strike is initiated and the warship dispatched. Once the vessel nears the shores of the occupied country, further details of the mission are revealed. It transpires that the gunship must infiltrate five occupied strongholds and use its advanced weaponry to take out various targets assigned by the mission controllers.

Dotted around the map are extra supplies, consisting of ammunition, armour and fuel for the gunship. Also found around the desert landscapes are MIAs (friendly soldiers Missing In Action behind enemy lines) who are rescued for extra points and may even supply some useful information once they are returned safely to the Desert Strike HQ. Double agents whose cover has been blown may also make their presence known. Rescue these disguised fellows and some of the enemy's twisted battle plans may be unveiled.

The enemy nation have not made things easy for you. During their short occupation, they have commended military posts armed with massive cannons and SAMs (Surface to Air Missiles). Enemy planes and choppers may also make an appearance. Not surprisingly, finding an advanced US gunship on their newly acquired territory causes them to fire at you without provocation. Luckily you have full authority from your superiors to use any methods available to complete your mission (in other words, you're free to blow the hell out of anything you want!).

But remember, your gunship only has a limited amount of armour and should the enemy forces get through your shielding, you're history fly boy!

▲ Your commander-in-chief gives you the full low-down between each mission. As you can see, he doesn't mince his words...

▲ This is one of two landing sites.

# DESE STRIKE RETURN TO THE

▲ These radar towers must be annihilated!

# DESERT STRIKE

## PROFILE AH-64 APACHE

The gunship you control in Desert Strike is the McDonnell Douglas AH-64 Apache, the final word in helicopter gunship technology.

**LENGTH:** 17.77m  
**HEIGHT:** 4.67m  
**WING SPAN:** 5.24m  
**WEIGHT:** 4,885kg  
**POWER:** 2 x General Electric T700-GE-701 turboshaft engines  
**MAXIMUM SPEED:** 227 mph

### ARMAMENT

Your Apache gunship is equipped with three forms of offensive weaponry:

#### CANNON

Obviously, this is far weaker than the missiles, but it's just the ticket for taking out smaller targets. One thousand rounds of ammunition come as standard.

#### HYDRAS

Although not as powerful as the Hellfires, these missiles are perfect for taking out small cannons and SAM sites. Unfortunately, their range isn't quite as impressive as the Hellfire's either.

#### HELLFIRES

These missiles are the most powerful weapon packed on-board your Apache gunship. Their range and destructive potential cannot be beaten by anything the enemy throw at you. The supplies of Hellfires are very limited, so use these with care.

▲ This is what happens once you lose all of your armour. You start with 600 points. A normal gunshot takes off one or two points. A well-aimed SAM or guided missile deducts up to 100!

### COMMENT

Similar in concept to a superb old C64 computer classic called *Raid on Bungaling Bay*, Desert Strike is another absolutely cracking title from Electronic Arts. It's basically a very sophisticated shoot 'em up with loads to do. The gameplay is brilliant and I love the way you can tackle things in any order you like - searching for MIAs first, destroying

**JULIAN** a power station or taking out the airport! You've also got to think ahead and work out optimum routes so that you leave yourself with enough fuel and ammunition to be able to complete all the assignments in that mission. Things get very tense when supplies are low and you've still got an assignment to finish AND return to the frigate to complete the level! The graphics (particularly the helicopter sprite) and the sound are both excellent and the whole game is beautifully presented with cut-scenes, mission details and map screens galore! But how long will all this excitement last? Ruddy agee, that's how long! There are five main missions, each with ten sub-missions, and later ones are incredibly difficult. And even if you get through them all, you still return to see whether you can score more points and find things that you might have missed. Desert Strike is the one of the finest Megadrive blasters yet seen, and you'd be bonkers to miss it.

▲ On level two, prisoners must be busted out of a top security enemy installation. Use your weapons to blow away a wall and winch up the survivors.

## THE STRATEGY MAP

Pressing **START** brings up the overall campaign map. Using the simple controls, you can find out what targets make up the entire mission, along with the positions of other enemy strongholds that may cause a problem. Intelligence also keeps you briefed on the whereabouts of MIAs, double agents and supplies.

▲ These tanks first appear on level two. As you can see, they're deadly.

## CUT SCENE ACTION

At the start of the game, you're treated to a brilliant attract sequence, where General Kilbaba reveals his plans for Middle Eastern domination. He also drowns a traitor in a vat of boiling water (!) and slaps his deputy around the face for the sheer fun of it! Between each level, yet more Kilbaba-related action is revealed!

▼ You can choose a number of decent co-pilots at the start of the game but the best is missing in action. Scour level one!

## COPILOT SELECTION

MAKE TO MISSING IN ACTION. REPORTS HAS BEEN IN ACTION. CHECK DANGER AND STAYED AWAY FROM THE BLD. STAYS THE BEST PLACE FOR A AND B.

PRESS START TO EXIT

## CO-PILOT THRILLS

At the start of the game, you choose your co-pilot for the mission. The co-pilot's job is to work the winch and aim the weapons you fire. Watch out though, because some co-pilots may be excellent marksman but could be complete imbeciles when it comes to using the winch. The best co-pilot in the game is missing in action, but you should be able to find him during the game.

**THE DANGLY BITS**

Being able to find extra fuel and weapons isn't much good unless you're able to pick them up safely from the air. Luckily, the Apache is kitted with out with a tally winch that automatically lowers itself when you hover over a box of supplies. This winch also comes in handy for picking up double agents and MIAs.

**A DANGEROUS ASSIGNMENT**

Mission targets should be destroyed in the order suggested by Desert Strike Command HQ. Should you attempt riskier targets without taking out previous threats, you are instantly in high danger. You can usually tell, owing to the large number of bullets whizzing through the air in your general direction.

**COMMENT**

Desert Strike begins well with an excellent introduction and some brilliant Rob Hubbard tunes. This quality extends to the game itself. It's not an all-out shoot 'em up as such. Of course, there are loads of enemy soldiers and targets to blow up, but the limits to your missiles, fuel and ammunition make you think before you blast. Adding variation are the sub-tasks, like picking up the MIAs and returning them to base. The graphics are excellent.

**RICH**

Although some of the backdrops look a bit repetitive, this is more than made up for by the brilliant definition and animation on all of the sprites. The gunship in particular is excellent. Desert Strike is also a very challenging game. You should be able to complete level one during your first session, but after that things get incredibly difficult with enemy tanks, SCUD missile launchers and bazooka-toting soldiers making things a bit trickier. Definitely the best Megadrive game this month, Desert Strike is a worthy purchase.

**DESERT STRIKE**  
RETURN TO THE GULF**BY: EA****PRICE: £39.99**

RELEASE DATE: FEBRUARY

GAME DIFFICULTY: MEDIUM

LIVES: 5

# MEAN YOB!

More letters. What would we do without them? And what would we do without YOB to answer them? If you've got anything remotely interesting to say, write in. The address is: MY FRONT DOOR IS VERY LUCKY BECAUSE IT'S GOT A BIG SHINY KNOB MAILBAG, MEAN MACHINES, PRIORY COURT, 30-32 FARRINGOON LANE, LONDON, EC1R 3AU. The best letter of the month gets £150.00 worth of software. All the rest get nothing, because that's the kind of guys we are.

## TOO MUCH MONEY, IT'S NOT FUNNY

Dear Mean YOB,  
I thought I'd write to express my views on the exorbitant pricing of both hardware and software. I honestly can't see the current console boom continuing for very long unless prices come down.

Take Sega for example. They claim their games are mostly directed towards children (which explains the amount of challenge to be found in most of their games), but how can many children afford to splash out thirty-five pounds every time they fancy a new game?

Despite any excuses they throw at us (cartridge costs etc) there is no reason why our games should cost twice as much as Japanese games.

Against seeming great company profit comes before the customers. Jason Sabouri, Clapham, London  
YOB: What you haven't thought about is that Sega games aren't made in the UK and they all have to be specially air freighted in from Japan or the States, which costs a lot of money. Plus there's the fact that most retailers don't discount their games like they do in America and Japan, so you're forced to pay the manufacturer's recommended retail price which is essentially the highest price they can ask. Irritating isn't it - but then that's what you get for living in Britain.

## SUPREME THICKIE

Dear YOB,  
I've just got a Megadrive and I've heard everyone rant and rave about John Medden's Football, but I don't know how to play the game, or should I say, I don't know the rules. I feel as if I'm missing out on a really special experience. Could you please educate me?

N. Southern, Kirby in Ashfield, Notts  
YOB: Go out and buy a book about American football rules (there's a very good one available for only £4.99) and watch the sport on Channel 4. And just in case you need telling, 'cos you're obviously completely thick, pull your trousers down before having a dump.

## BACK ISSUES NO WAY

Dear YOB,  
I would like to congratulate you on such a wonderful Christmas issue. I particularly liked the hologram of Super Mario and the 196 pages. I shall cherish it for life and frame it. Once again I would like to congratulate you and the team on such effort over the year. Here are some questions to tackle.

1. Will there ever be any back issues because I have only started collecting from issue 13?

2. I was looking through a dictionary one day and saw 'console' in it. It said 'To give comfort or sympathy' is this where they got the word from because my Megadrive comforts me anyway?

Lucy J Fullford, Winton Green, Birmingham

YOB: We might do some kind of Best of MEAN MACHINES treasury edition later in the year, but there's no chance of any back issues I'm afraid - you'll just have to advertise for them in Megastart 2. Yup.

## SAD

Dear MEAN YOB,  
I am writing to you in a very sour

▼ A valiant effort from Tom Percival.

tone. It is you and about your decisions to print certain letters. For example, I have written in to your rather good/funny/amusing section about seven times and not had one letter printed. Also I have sent in about four different pictures, all good, one even of you, and none printed.

At college my mate Maxine thought the one of you was good enough to print and yet you refused. Please print this as I am sure many readers with mates at college called Maxine feel the same.

Michael Price, Hedge End, Southampton

YOB: All your previous letters were complete and utter crap, despite what your 'mate' thinks. The only reason why I'm printing this one is because I can poke fun at your angular lack of talent and gross ineptitude.

## SKILL SUGGESTIONS

Dear YOB,  
Yo! How's it hanging? Today I get the bus down the town centre to collect my copy of MEAN MACHINES from WH Smiths.

You should sell more **MEAN MACHINES** merchandise. How about selling games through mail order?

Why don't you include a game diary which tells which games come out which months. This could include ratings, formats and comments.  
*Christopher McDonnell, Hartlepool, Cleveland*  
**YOB:** Thanks for your suggestions - they're pretty good. I've passed them on to Jazzy and he's put them in the pockets of his special brill new idea trousers.

## ACTION STATIONS? NO WAY

Dear **YOB**,  
 My name is yours truly. I wrote not long ago and I forgot to add something on. I live in a very small town in Australia not anywhere near Woolworths so could you send me an **ACTION STATION** for Nintendo and Sega? I own a Sega Master System and a Nintendo Gameboy so your **ACTION STATION** will be much needed.

Your magazine is totally excellent and your reviews are outstanding.  
*Reuben Porter, Proserpina, Queensland*  
**YOB:** No way! What do you think we are? A charity for sad bastards?

### ▲ Oz gets his revenge

When I got into the shop I realised how right you were about copies of your brilliant magazine selling out fast. There were only four copies left! When I was going home on the bus I glanced through the pages of your brilliant publication and I was amazed at the excellent quality of the magazine, though I have some suggestions that I think might improve your magazine. Here are my suggestions:

I think having a back issues section would be a great help.

What about a subscription offer?

# MEAN YOB!

## BANDWAGON JUMPING?

Dear MEAN YOB, I am writing to complain about Sega. I own a Sega Megadrive and am very pleased with it. But Sega are producing terribly boring and easy games. Most of my games (which are mega) are by Electronic Arts. But as I look through brilliant games such as MEAN MACHINES, CVG and Complete Guide to Megadrive I see that Sega are trying to out class EA. Here are some examples:

Sega Ice Hockey vs EA Ice Hockey

Joe Montana's vs John Madden's

Super Real Basketball vs Lakers v Celtics

I could go on. Now it's 'Oh! Electronic Arts are bringing John Madden's '92 out so we (Sega) better bring a game out to challenge it.' and sure enough, POP, out comes Joe Montana 2.

I'm really peeved off. Why can't Sega think of and design their own games instead of ripping Electronic Arts off. If I was director of Electronic Arts I'd damn well do something about it. Why don't Sega stop and make their own games because they could never produce anything better than any Electronic Arts game. Now onto playing games. I am not saying Sega Sonic was challenging RoboCop (EA) but my mate reckons that Sonic is better than RoboCop, is it? Well, I told him to kiss my ass and don't be thick P Spooner, Hillsborough, Sheffield

YOB: An interesting point, but I think you're being unfair - games are developed in strict secrecy, so I don't think there's

any idea of what's going on. I think that what happens is that companies see that there's a gap in the market and race to develop a product - rather like the movie industry where you get a piece of certain kinds of film all cropping up within a few months of each other.

## DON'T LIKE THE SEGA ADS?

Dear YOB, At last, Sega have got round to giving the Megadrive a proper advertising campaign, but unfortunately we see two seconds of the games and the rest of the ad is taken up with some dimwit and martial arts rubbish.

Regarding the Christmas issue, I loved it! The mag arrived with perfect timing, on my birthday. I was a bit disappointed by the hologram, I'd just got a much smaller version with CVG. Thank God you changed the layout of the reviews! The demo issue's reviews were a bit simplistic.

Why does every console mag seem to have an "exclusive" review of Sega Sonic? It reminds me of the papers.

Finally, are we going to see any more of Radion's cartoons? They were excellent.

Matthew, Bury St Edmunds, Suffolk

YOB: Radion is a busy beaver, but we'll try and goad him into doing some more cartoon tomfoolery.

▼ **Matt Godfrey** drew the line team picture.

▲ **Tom Perchard depicts Radion as a demoralised fetishist - how did he know?**

television and just put it on the aerial from your pocket TV (joining them with selftape would work). Now tune your pocket TV in the usual way. When you've got Megadrive graphics on the screen, you can use the Megadrive joystick to play.

This will also work with the Atari ST and the Gama Gear, so if you've got a pocket TV you can save money on a TV lunar James Goff, Sheffield, Yorks  
YOB: What a retard.

## PIRATE CONSOLES

Dear YOB, I am very, very, very annoyed. I have recently heard of the DAG Nintendo compatible. Surely you or Nintendo aren't going to let these fly by cowboys get away with this? They need their heads kicked.

Andrew Malvisi, Cnelf, Scotland  
YOB: The great Nintendo legal steamroller is currently moving onto this subject so we speak.

## BURGER ME SIDWAYS

Dear MEAN MACHINES, Your Oz Burger comp got me thinking. Meat companies always insist that their hamburgers contain real beef, but this can mean of any quality or any proportion of it. Most hamburgers actually contain very little meat. It you knew what the rest was you wouldn't want to touch it, let alone eat it. While the cows are alive they are continually injected with chemicals and hormones which then end up in your hamburger.

That's one good reason not to eat hamburgers, another is that meat companies exploit third world people. They clear forests and take land from poorer countries to graze cattle for hamburger chains. The people are then left with little or nothing to survive on so they end up having to destroy what is left of the surrounding environment.

If you do insist on eating meat then buy organic, it is healthier for you, kinder to the cow and fatter for the third world.

Information about organic meat and other organic foods, plus a safe list of meat (costing 2.00) can be obtained from:

The Soil Association, 86-88 Colston Street, Bristol, BS1 5SB, Linda Walton, Bury St Edmunds, Suffolk

YOB: I watched a programme on Channel 4 last year about how the burger behelms make beefburgers. It pulled no punches in showing the disgusting way that cattle are killed and sliced up - sometimes while the beasts are still half alive - by people using giant chain saws. And while I'm wise enough to know that there's

nothing I can say or do to stop people from guzzling burgers, it is something you should think about. Why not occasionally try alternative fast foods, - or even try a spicy bean burger every now and then.

## ACTION REPLAY FOR SAD BABOONS

Dear YOB,

I have owned a Master System for two years now, and have decided to sell it and buy a Megadrive. Recently when I was reacing the Christmas edition of MEAN MACHINES I noticed an advert called the Action Replay cartridge, so I read on it says that it is a latest craze that lets you have unlimited lives etc. Is this a sad excuse for the manufacturers of sad items to make a quick fifty pounds or am I wrong? I agree that for sad, shambling baboons of players (like the CVG lot) this would be a good idea, but won't this spoil the gameplay and fastibility of your cartridge? I don't know a lot about the Action Replay cart but in my opinion it is a sad excuse for Sega hardware, when you spend forty pounds on a game you want total fulfillment out of it don't you?

Andrew Buttery, N Wales  
YOB: I think the idea of the cartridge is that if you ARE a shambling baboon it lets you cheat away to your heart's content.

### ▼ Matt Godfrey returns! MARIO vs SONIC

### ▲ Matt Godfrey returns!

## CONSOLE ACCELERATION

Dear MEAN MACHINES, I don't know whether you have heard about accelerator boards available for the Amiga 500, 2000 etc but they enhance the speed at which the computers process data. So the Amiga 500 has a CPU speed of 7MHz and can be as much as 40MHz, also the ECS (Enhanced Chip Set) and soon a new sound chip are in the making.

So to cut a long story short instead of Commodore just trashing the A500 and bringing out something else, they have just decided to update the chips in the machine. So why don't Sega and Nintendo and others do the same instead of just making a whole new machine??

The Megadrive may change the games world with its CD-ROM but with all this technology it is still only able to display 64 colours at once! The Neo Geo is able to display 4096 colours at once from a palette of 65000+ colours and shades, and that is a console alone. If you're to have huge CD-ROM games you need more than a lerty 64 colours  
N Southern, Kirkby in Ashfield, Notts

YOB: I asked Jezza and he says that the good thing about console games is that you CAN put improved chips into game cartridges - Nintendo's Super Mario III has an MMC6 chip with bigger mamory, more colours and better sound capability than a normal Nintendo game chip. Sega are working on a new generation Mega-drive game chip as we speak - we'll fill you in when we have more information.

# Q+A

## MEMBER

Tim Spencer, Nottingham

Dear Jaz,  
My mate and I often argue about these things so please could you give us an honest answer?

- 1 Which is worst, Shadowgate or Dark Castle?
- 2 Which machine generally has tougher games, the Master System or the NES?
- 3 Is the Commodore CDTV a feeble effort that the Megadrive CD ROM will blow away?
- 4 Is Master System California Games better than the NES version?
- 5 Sum up in one word, each game, what you thought of Ace of Aces and Nintendo World Cup.

**JAZ: 1.** A difficult one. On the one hand, Dark Castle is slightly better because at least you can laugh at its comically tragic sound effects. But then again because Shadowgate is a Nintendo cartridge it's big enough to use as a teapot stand - Dark Castle, being a Megadrive cart, is too small for the job. **Hmmm. 2. NES.** 3. Yep. 4. Yep. 5. Ace of Aces is a horribly disgusting pile of steaming cack and Nintendo World Cup is a villa waste of cash that should never have seen the light of day.

Here we go again, with another steaming pile of questions for that long-suffering console genius Jazza. He's got his rather ripped, but extremely stylish special answering trousers of doom on and is, as we speak, ready to answer all your queries. If you've got anything to ask, write to: **MY LETTER**

**CONTAINS MORE QUERIES THAN SAN FRANCISCO, MEAN MACHINES, PRIORY COURT, 30-32 FARRINGTON LANE, LONDON, EC1R 3AU.**

## ROD

Dearest Julian,  
Having adopted such a fawning tone, please help me out with these questions:

1. Given the following set of circumstances, would you recommend a Game Boy or a Game Gear?

I travel a lot and spend much time in hotel rooms, therefore battery life on either machine is not a concern, nor does the console strictly have to be pocket-sized. Also, since I have a Megadrive at home, I will only need purchases, at most, four or five games for my

hand-held, although they will have to have long-term appeal.

2. Having played platform games since the days of 'Manic Miner' and 'Jet Set Willy', I am constantly on the lookout for games of this ilk which will afford me a real challenge and will last. Bearing in mind that I finished Sonic in two days after I bought it and Mickey Mouse on my sixth attempt, what would you recommend?

Recently a certain importer (who I shall mercifully allow to remain nameless) claimed that official UK Megadrives were both PAL and SCART at the same time. Is he talking a heap of trouser fudge as I sneakingly suspect? *Stuart Cameron, Airdrie, Strathclyde*

**JAZ: Oooooo. A tricky one.** I think that the Game Gear would be my choice, simply because you could get a tally adaptor too, just in case you were booked into a room which didn't have one. The other alternative is to buy a Megadrive hard carry case and take it along with you! That certain importer is speaking the truth, by the way. All you need is a Megadrive SCART connector (most specialist computer shops have them) and Bob's your Uncle: fab-u-lose SCART-o-vision.

## PISTON

Yo Jazza!  
I have a question which I'd like you to answer.

In issue 13, you reviewed Ficky for the Megadrive. You gave these awards to it.

PRESENTATION: 25%  
GRAPHICS: 31%  
SOUND: 31%  
PLAYABILITY: 94%  
LASTABILITY: 93%  
OVERALL: 92%

## DANGLE

Dear Jaz,

I own a Megadrive and was wondering if my favourite coin-op, Sengoku, will ever appear on it.

Also will the Super Famicom, Neo Geo or the PC Engine ever come to Australia? I think MEAN MACHINES is a great magazine, keep up the good work. Steven Gillies, Muswellbrook, Australia

JAZ: Sengoku? No chance - that's a Neo Geo game. The Super NES will be in released in Australia later this year.

How can this be? You should judge a game by all its good or bad features, not just the good features. Well, how do you make out the overall percentage? Paul Lim, Birmingham, W Midlands  
JAZ: Doh! We do judge a game by its good and bad features, which is why it scored so badly on graphics and sound. But when it comes down to the bottom line, it doesn't matter how brilliant or cack the graphics and sound are, it's the gameplay that's all important. You can have the greatest graphics and sound in the universe, but they're worth

nothing if the game is dreadful to play. On the other hand, if the game is mega-addictive (like Flicky), you can still really get enjoyment out of the game even though it looks rubbish. The overall rating is an independent mark which indicates what we think of the game itself - whether it's fun and addictive, or a pile of cack that you'll become bored of within minutes.

## LIMP

Dear Jazza,

I have some questions for you to answer and I want some straight answers.

1. Will those games be coming out for the Maetor System: Stroots of Rago, Final Fight, Jameo Pond, Pond II Robocod, Simpsons the coin-op end Golden Axe II and if not why not?

2. Why isn't there any karate boot 'em ups on the Maetor System recently released?

3. Is the rumour true that the price of Sega games will be coming down in the next year or so?

A Dawson, Unstone, Shaffield

JAZ: 1. Out of all those games, only the Simpsons end Streets of Rage will appear on Maetor System, and neither will be ready until September 2. Dunno. 3. Poetibly.

## HARD

Greetings mortal human, I've got some questions.

1. Why do you print games with low ratings? I mean why should you do reviews on games that are absolutely crap?

2. Is there any chance of a Moonwalker 2 coming out on the Mogadrivo?

4. Is there going to be a Link (Zelda) III on the NES?

Sir Goo Gutsweaker the third, the Netherlands

JAZ: 1. So you know that you shouldn't buy them, you stupid clog-wearing, edam-eating cretin. 2. No. 3. Yes, it's available on Import now end is officially released in August.

## TROBBING

Dear Jaz,

I am your number one fan So far that I was wondering if you could answer these questions.

1. If the Mario Bros (Mario and Luigi) had a fight against Alex Kidd end Sonic the Hedgehog who would win?

2 Which games are better the Alex Kidd adventures or the Mario adventures?

3 Which console is better for graphics, sound etc the Sega Master System or the Nintendo NES?

4. Is a colour Gameboy coming out end is it better than the Game Gear?

Greg Brown, Woymouth

JAZ: 1. What sort of a dumb-ass question is that? How the hell should I know? 2. The Mario game dump on Alex Kidd adventures from a great height. 3. NES for sound, Maetor System for graphics. 4. Don't know - Nintendo are still working on the colour Gameboy.

# ES

Hiya! Welcome to the February edition of the Tips Section, packed with amazing hints and tips for your console. We've got some completely amazing specials this month including amazing Player's Guides of Donald Duck, Quackshot, Marble Madness and the awesome F-22 Interceptor! Remember, each month we're doling out £150.00 worth of software for the best tips we receive. This month, the goods are winging their way to Justin Harris from Leeds for his F-22 stuff. Just think, if you pull your finger out, next month, it could be you!

"Steve" from Walthamstow sent in this tip that actually allows you to play a mini game of Fantasy Zone on this golf simulation! I know it sounds like a bit of a spin, but we haven't got the cartridge to test it on yet! Skill, give it a whirl - it might just work...

Start the game and take 100 strokes (without sinking the ball). When it says GAME OVER, press UP, UP, DOWN, DOWN, LEFT, RIGHT, LEFT, RIGHT and button A. The screen should change, enabling you to play Fantasy Zone, or so "Steve" reckons anyway.

This game is probably one of the most involved arcade adventures you can buy for your beloved Megadrive. Peul Connor from Skerton in Lancaster has decided to share his fine knowledge of the game to you lesser mortals out there. First of all, he's provided the complete solution to the last level.

The dragon's lair is located in the centre of the bottom room. It's in the form of a pit. Don't swing out - let your staff snap and you should fall into the lair. Select Blink magic and use all six spells, then select fire magic, which will protect you from the next blast. Now hold up the amulet, but don't read the runes. Now Mordemir appears and purloins your amulet. Select status magic and use it three times. Now select the sonic spell, which protects you from the sonic sounds Mordemir chucks at you. After this use status magic twice again as Mordemir blasts you. The skeleton at the left will now fly at you, so use your last status magic. Now take the amulet from Mordemir using the magnetic spell, and that's it - easy!

And if you're stuck earlier on in the game, try out these mega codes!

- LEVEL TWO:**  
757FC10006F70
- LEVEL THREE:**  
6E1EC21000E10
- LEVEL FOUR:**  
D9BE53101EB0
- LEVEL FIVE:**  
B57F943000EB0
- LEVEL SIX:**  
563FF53010A41
- LEVEL SEVEN:**  
C250F63010AC1
- LEVEL EIGHT:**  
E011F730178C1

## TIPS

牛

# DYNAMITE DUKE

Christopher Keenan from Glasgow sent in this fine tip for the game known in our three dimensions as Dynamite Duke. Press the **C** button ten times on the title screen, then choose the **OPTIONS**. Press **C** ten times again and you should see a new selection on the menu - **SUPER OPTION**. Choose this and can choose the final missions with loads of extra lives and continues. Cool!

## TIPS

 MANHUNTER CENTER  
**X-GrenadeX**  
 クラタ

Word reaches our ears of a super mega weapon in Grenade X. On level two of this tank-based eight-way scrolling blaster, go to the end of the pole on the left-hand wing and wait for five seconds. The weapon will float onto the screen and connect to your ship! This is the only spot in the game where you can pick up this weapon.

Someone who forgot to include their name (but lives in Middle Herrington, Sunderland) sent in these Road Rash tips to complement the two page Player's Guide we printed a couple of issues back. Thanks, whoever you are!

**LEVEL ONE**

This is really simple. Build up lots of cash on this level, but DON'T buy the Banzai bike. Save your cash and buy the Kamikaze motorcycle, by just racing on the easy levels. This bike should be able to outclass all of the level two bikes. Once you've got this bike, complete the other levels and press on to level two.

**LEVEL TWO**

As with level one, just save as much cash as possible. When you get your hands on £12,000, get some more money in case of fines and buy the Shunken 1000 bike - this is one mean speed machine! The handling may be a bit dodgy but you need the speed to outclass the level three nads.

MEAN MACHINES 31

**LEVEL THREE**

The Diablo 1000 bike, the most powerful of all, can be bought on this level. Keep on saving. You get £2,225 for every win so it shouldn't take you long. So, with this bike, you don't really need tips for the next two stages do you, eh? Still, to get this far without even trying, enter this code:

10000 03JA1  
00305 371VU

## BIONIC COMMANDO™

Lee Davie (for it is he) from Blythe has a cool cheat for Bionic Commando - the fine Capcom platform game. When you lose all of your lives and the GAME OVER screen appears, keep your finger on the A button. When the title screen appears, press START quickly and behold - you should have nine continues! What's more, you can keep on doing this for ever and ever! We-heyl!

## Isolated Warrior™

This forced perspective 3D blaster received quite a respectable mark when we reviewed it in MEAN MACHINES a good while back. John Stonebridge from Deal in Kent obviously thinks it's pretty good, because he's sent in the complete set of codes!

**LEVEL TWO:** 1227 or 5963

**LEVEL THREE:** 0501 or 4126 or 8920

**LEVEL FOUR:** 0705 or 0948

**LEVEL FIVE:** 2168

**LEVEL SIX:** 0666

**LEVEL SEVEN:** 1192

ON THIS STORY, FIGHTS WITH ALIEN CREATURES THAT HAVE INVADDED HIS PLANET FROM AN UNKNOWN WORLD.

As a test of ultimate dexterity, Marble Madness can't be beaten. Although there are only six levels in every console version of the game available (Megadrive, Nintendo, Gameboy and out soon on the Master System), each is a real challenge to your game playing abilities! Bernard Johnston from Swansea sent in this topper guide to this ball-rolling extravaganza! Cheers, Bernard.

## LEVEL 1 PRACTICE RACE

Obviously, this is the easiest race in Marble Madness. Aim to complete this race as quickly as possible, missing out on any collision with the safety rails. You should be able to finish this race with 54 seconds remaining. This level also has a gateway to the secret waterfall level (there's a special MEAN MACHINES prize to the first reader who can find out how to get there and write in telling us).

## LEVEL 2 BEGINNER RACE

Practice swerving around the first few objects and avoiding the black marble running up the first slope. A good head start during the first part of this level builds up precious seconds.

Avoiding these sucker creatures is simplicity itself. Time your approach to this ramp so that it's lowered when you speed past. Take that chute on the right to save seconds.

This whirlpool arrangement is best dealt with by skimming along the left-hand side - you should just miss the hole and reach the GOAL! with ease. Hopefully, you'll have around 60 seconds of time to spare as well.

## LEVEL 3 INTERMEDIATE RACE

This is definitely a speed race. The first few hazards are designed just to slow you down rather than cause any head-scratching puzzles.

You can avoid having to use the wave machine, but it does save time - and those valuable seconds do come in handy. There's no clear tip here. Just practice using the machine and you should get the hang of it pretty easily. By the end of the level, you should have around 75 to 80 seconds left!

LEVEL  
5SILLY  
RACE

TIPS

'Everything you know is wrong' is pretty pathetic advice for this round. Just remember that gravity has been reversed, making it actually easier to go up the ramps!

This pit of little meanies is your life line. Try to squash as many of these little blighters as possible as they each endow you with two or three extra seconds! Don't take too long though, or the advantage is lost. When you reach the GOAL flag, you should have around 65 to 70 seconds spare.

LEVEL  
6  
ULTIMATE  
RACELEVEL  
4AERIAL  
RACE

These vacuum cleaners are the biggest problem. Just keep the boost button pressed and speed through. Watch out for the corners though!

This catapult springs you straight into black marble territory. Don't try to take it on. Just take the left route and roll as fast as possible!

A big jump is required to cross the void and land in that large hole. You should come out of one of the two exits. The right path is a lot easier than the left, but you have little choice in the matter.

This big pool of ice is a real bitch to conquer. The best bet is to stay at the top end, press down-right and the boost button. You should get through, but it's all down to luck when the Black Marble factor is added in as you don't know how it reacts to your presence.

These disappearing blocks are a real test of your ball-controlling abilities, and it's here that your hard earned extra seconds come in handy. The best tip is just to take it easy and keep your finger off the boost button.

Here's a particularly complex cheat to get you infinite potions and wizards on the mega topper exploration game by Software Creations. Push SELECT to go to the sub-screen and enter the following combination.

**B, START, START, B, B, START, START, B, B, START, START, B, START, B, B, B, START, START, START, B, START, B, START, START, B, START, START, B, B, START, B, START.**

You should know if the cheat has kicked in because the screen will flash. Now just return to the game and every time you want your lives and potions topped up, just press SELECT! Thanks to Shane Smith from New Zealand for this tip!

## POWERBLADE

Shane Smith from New Zealand sent in a whole heap of NES cheats old and new. Perhaps the most interesting were these codes 'n' tips for this newish game.

First of all, to get a sound test, hold down UP-RIGHT on control pad one and then press SELECT. Now press DOWN-LEFT and SELECT on control pad two, and press START on controller one.

Electronic Arts came up with the first Megadrive flight sim, and it's a real cracker (scoring 93% in MEAN MACHINES). However, unless you eat every option to EASY, it's a bit of toughie, so we decided to bring you this mega tips special. Enjoy!

# F22

## INTERCEPTOR

### F22 DAMAGE

It's quite difficult to keep a track of the damage your F22 sustains. This means it's quite difficult to predict how much more damage your fighter can take. Use the PAUSE screen to have a look at how battle damaged your F22 is. If it has damage all over, call in the tanker for refuelling and repairs.

### REFUELLING ACTION

... and re-fuelling the tanker is quite a difficult task. The key is to finish the preceding mission with the horizon perfectly level in front of you. You always begin the next mission at the same angle, so if you're level, you're automatically straight behind the tanker. Now just accelerate a tad and you're refuelling before you know it!

## LANDING YOUR F22

Landing in F22 Interceptor is usually very simple, as you begin your descent in exactly the right position. Like refuelling though, remember to stabilise the horizon in the preceding mission, otherwise your approach to the runway is immediately spoiled.

## THE ACES' CHALLENGE

The Aces' Challenge is the most incredible test of air-to-air combat skills known in the world. The four most dangerous pilots take to the skies, challenging you to blow them up - by using your cannon alone! After all four aces are defeated, you fight two ere once and the final challenge is all four of them up against one of you (try out this passwork to get you straight there: MH01M3). Suffice to say, the most important thing to do is to save your cannon fire. You've only got 300 rounds per ace! Here are the best tactics for taking out each:

The Iraqi ace flies a MiG 21 - a pretty primitive aeroplane compared to your F22. Although he is a good pilot, the slow speed of his plane and its clumsy handling soon have him in the centre of your sights. Just follow the red box and barrel roll should the word BREAK appear on your HUD.

## MEGADRIVE

## TIPS

牛牛果

The American ace is the deadliest of all, flying an F22 - just like you! Simply twirling around in the air trying to get him in your sights is a waste of time (use the outside perspectives to see what we mean). Running away is probably the best tactic, using the breathing space gained to get the American ace in your sights. He's got to follow you, and it's at this point when he's still quite a way off, that he's at his most vulnerable. Good luck!

This Korean ace flies a dangerous MiG 27, handling it like a real pro. Should you just follow the red box in order to zero in on him, you'll doubtless find yourself pointing at the sun. While you're blinded, he acts, blowing you out of the sky! If you're having problems, just thrust away from him and turn to face him normally. Your F22 can take more damage than his MiG.

Flying a deedly MiG 29, the Soviet ace is faster and far more dangerous than the Korean professional. Should you choose to follow your computer radar to catch this guy, you soon feel the effects of red-outs and black-outs. Use the same tactic as the Korean ace to blow this sucker out of the sky, but barrel roll as you face him, cannons blazing, to avoid most of his fire and cause some serious damage.

Maverick missiles need to be manually guided into their targets. Unfortunately, these missiles are not very good at moving in any direction other than forward. That being the case, always move the target into the centre of the crosshairs before firing, otherwise the chances are you'll miss completely and look like a right spaz. Using Mavericks on airborne targets isn't very clever. Only try this as the (very) last resort.

## GUIDED MISSILES

## AIR-TO-AIR ACTION

Remember that unless you're cheating, missiles are always limited. That being the case, use your cannon for the majority of targets. Enemy choppers have the thickest armour, so always keep some missiles ready for them. Combat itself is quite simple. Just follow the red box until it's in the centre of the screen. When the sight is green, open fire. If an enemy fighter is burning past you, adjust your aim so your bullets fly straight into your opponent. BOOM!

Mr Sean Devoy from Newmarket in Suffolk sent in this little cheat for WWF Wrestling on the Nintendo. On an eight bout match, get out of the ring. The other wrestler should now follow. Quickly get back in and jump back out again. Now keep your opponent from re-entering the ring and he should be counted out and disqualified. You can do this with every opponent and beat the game easily. Funny, enough this works on the Gameboy version of WWF Superstars too!

## GAMEBOY

## LOCK 'N' CHASE

Yet more Gameboy-related tip-dealing from the man known as Mark Gilleece from Dublin. To gain access to the higher levels press A, A, B, B, A, B, A, B on the title screen and you're away! Blimey

## BATMAN

Recently released officially, this Sunsoft platform game is pretty excellent indeed. It's also known for its completely lab music (still some of the best ever produced for the ol' Gameboy). To access the sound test and listen to all of the music at your leisure, hold down UP, RIGHT, and START on the title screen. There you go. Now perhaps you could hook your Gameboy up to your 1000 watt stereo and have a good dance (?) Thanks to Russell Goodchild from Princes Risborough for that

## NINJA BOY

The boy Russell Goodchild also sent in a little tipette that should help out frustrated Ninja Boys out there. To get unlimited continues, when the GAME OVER screen appears, hold down A, B, and START.

## CASTLEVANIA II

Nathan Best from Wootton Bassett near Swindon sent in some groovy codes for what must rank as one of the best platform games available for the Gameboy. Watch out though - our word processors can't replicate the code symbols the game uses, so H is supposed to be a heart, O is an orb, C is a candle while B is a blank space.

## HHHH

This code brings up the sound check

## HHOB

Entering this allows you access to the cloud level

## HOCC

This takes you to the last level!

## NEMESIS

Mark Gilleece is a pretty polite chap, "I submit the following tips that they should be of some use to fellow Gameboy players". For Nemesis, press START during play to pause the game then press UP, UP, DOWN, DOWN, LEFT, RIGHT, LEFT, RIGHT, B, A, B, A and then press START again and you should be blessed with a complete complement of power-ups! Coincidentally, the same cheat works for the PC Engine and Nintendo versions of the game

## SUPER MARIOLAND

According to the official Nintendo charts (as published each month in MEAN MACHINES) Super Marioland is always the best-selling cart every month (??). If that's the case, these tips should come in handy for lots of people, eh? Follow these guidelines to visit EVERY bonus room in the game!

WORLD 1-1: Pipes three and six are the ones for you

WORLD 1-3: Pipe nine contains the goodies

WORLD 2-1: The first and last pipes yield results

WORLD 2-2: Once again, the first and last pipes are the ones to check out

WORLD 3-1: You guessed it - check the first and last pipes.

WORLD 3-2: Only pipe seven need be checked

WORLD 3-3: The fourth pipe you pass on your travels should be used

WORLD 4-1: The first and thirty-fourth pipes come up trumps.

WORLD 4-2: The twelfth and second pipes are tops in the bonus department

# QUACKSHOT

カックショット

STARRING

Donald Duck

## 1 TRANSYLVANIA

## 2 THE PALACE

Boasting cartoon-quality graphics and groovy music, Donald Duck: Quackshot is proving to be right popular with Megadrive gamers. We've had two in-dept guides from James Norton of Rule1p and Neil Fletcher from Solihull. This month, we'll print the complete evolution, but you'll have to wait until next month for the necessary tactics to do over the end-of-level boss! But for the time being, check out this meager plan, starting at Transylvania!

Complete the first two easy sections, and then on the level after the water stage put on your bubble gun and shoot all the blocks along the way. Finally you'll find a block that doesn't explode. Jump onto it and you'll find that it takes you up. Use your plunger to climb through the gap and exit through the door on the right. The next level is pretty simple. On the stage following that you'll face up to another big blue ghost. Keep walking right until you find a hole in the ceiling. Climb through it using your plungers. At the top, take the door to the right. Go through this to face up to the evil Count Dracula!

Continue as far as you can until you meet a duck sitting on a cushion. Accept his challenge and you appear on a new stage with the number '1' above all doors. Choose the last door. Now number '5' appears above all the doors. Go left a short way and collect a chicken, then enter through the only door remaining to the right. Now the number '2' appears above all the doors. Choose the second to last door (the third one) and exit. The number '6' now makes its presence felt. Use the third door to the right. Slide through a passage and jump up to reach the end-of-level boss - the tiger! Once he's been defeated collect the Sphinx Tear and travel to Egypt.

## 4 VIKING SHIP

Go as far as possible into this level until you come across the upset Viking. Use the key here to unlock the door. Once inside, walk left and climb down a ladder. Waddle left so you're facing the wall and use your plungers to climb up a bit. Walk through a hidden passage which leads to the Viking. Kill him and collect the green plunger from the good Viking. Make your way back to the South Pole.

## 5 SOUTH POLE

Continue from where you fell off on this level and use your green plunger on the bird (stand underneath it to do this). Make your way to the other side of the level. Now walk right until you can go no further. Smash the cubes using the bubble gun. Keep blowing up the cubes until you come across the Viking glory. Make your way to the surface and walk right. You should be instantly warped to a new level.

## 6 THE HIDEOUT

There shouldn't be many problems on this level. Just go right until you enter a room where you face up to the evil Pele himself. Kill him, and use the diary to whisk yourself away to Treasure Island!

## 3 EGYPT

Use the Sphinx Tear to enter the door previously locked. Later on in the level. Once inside, continue all the way until you have to duck to continue. Go right and you'll find yourself having to repeat this again. This time jump up and use your plunger. You should collect an extra life and some other goodies. Continue until you have to drop down and land onto a ledge on the right. Walk right and you come to a place with four blocks in the ground. Act quickly here, by first jumping on the sun block, then do the same to the moon and the star blocks. This stops the ceiling from falling in on you. Collect the Sceptre of Ra and climb down to the mine cart level. Once you're free to call the plane, make your way to the South Pole. Using the Sceptre of Ra, melt the ice around the imprisoned key and collect it. Now call the plane and head for the Viking Ship.

## 7 TREASURE ISLAND

Again, you shouldn't have too many troubles with this level. Just continue your wedding activities until you come to a moving well. Use your plunger to climb up through the gap in the ceiling. Now duck and slide right. You should be on the edge of a cave. Jump around a little bit and a block should appear. Move to

# XENON II

Those evil Xenites are back, and this time they're twice as deadly! After having their baboon asses well and truly dusted in Xenon I (a computer game which never appeared on the consoles in any form at all), they retreated and regrouped, coming up with an even more deastardly plan for universal domination!

And what a plan it is! Their new blueprint for cosmic supremacy involves striking at the heart of the Earth Empire by blowing up massive bombs throughout the planet's past history, thus making it an easy target in the future. To give their dangerous scheme an even bigger chance of success, they've also deposited massive laser-spewing forces to guard the bombs, along with gargantuan end-of-level bosses!

As you may have gathered, behind the scenario lies a vertically scrolling shoot 'em up, boasting five levels of explosive blasting mayhem all backed by a Megadrive rendition of Megablaster - the ball-bouncingly brilliant Bomb the Bass theme tune!

▲ The first boss is seasawty!

## COMMENT

The unusual, but superb graphic style puts this a cut above most Megadrive up-the-screen scrollers. Just a swift glimpse of the screenshot is enough to show you that it's a veritable eyeball feast, with excellent backgrounds and some outstanding sprites, particularly the end-of-level bosses. The game runs along at a fair lick, with plenty of baddies whizzing around and the Xenon snip pumping out a barrage of laser and missile death, and on higher difficulty levels the action provides enough challenge to test your blasting skills but is still enjoyable enough to keep you playing without getting frustrated. The only disappointment is the slightly juddery scrolling, but since the action is of such good quality I think most Megadrive shoot 'em up fans will happily overlook that flaw.

**JULIAN**

## BOOM-SHANKER

Xenon II is packed with very nasty bosses to blow up. The first boss is a laser-splitting shellfish of doom. However, this is pretty pathetic compared to later bosses that include the like of flying crabs (??), web-spinning spiders and serpentine alien battle cruisers!

MEGADRIVE

REVIEW

# MEGABLAST

CRISPIN'S LASER  
DEATH SHOPPE

During the game, cash is instantly added to your bank account by blasting entire attack waves or blowing up multiple hit meemies. After a boss has been annihilated, the Xenon ship is instantly warped to Crispin's Laser Death Shoppe, where weapons are both bought and sold. Watch out though, Crispin's prices are extortionately high and he doesn't pay much for second-hand gear.

## BLAZING LASERS

Bolt-on lasers are the most powerful weapon in Xenon II, cutting through meemies like a hot knife through butter. Once powered-up to its limits, it's a formidable force

REVIEW

LASER DEATH AHOY!

The Xenon craft's main laser is pretty weedy to start off with, but after successive power-ups (and the additional double-shot pod), it becomes a force to be reckoned with (or run away from).

SIDE 'N' REAR ACTION

Pods can be installed to power-up side and rear fire on your Xenon craft. However, you cannot have both mounted on your ship at the same time - doh!

MAKE IT MINE

Mines are a pretty useless addition to the Xenon ship, making it impossible to mount a rear-fire laser. Controlling the mine drone is difficult owing to the fact that while you're moving it around, your ship is uncontrollable, and thus defenceless.

COMMENT

enjoys the Amiga version of this game a great deal when it first came out two years ago, and the Megadrive version is just like a speeded-up version of the 16-bit classic.

RICH

Perhaps the best thing about the game are the distinctive graphics (no other Megadrive game has a style to match these cheesy visuals) and the vast amounts of weapons the game offers. On the minus side, there's nothing here in the gameplay stakes that hasn't been done on the Megadrive before - and the jerky scrolling just can't be forgiven. I was hoping that Mirrorsoft were going to jazz up Xenon II a tad with more levels and smoother gameplay - after all this is almost exactly the same as the Amiga version and far more expensive! Shoot 'em up fiends will get plenty of enjoyment out of this, but I was hoping for a little more.

CANNONS ON A STICK

Cannons don't take as many power-ups to reach their optimum level. The cannon shell always explodes on contact with its first target (while the laser cuts through).

BACKWARDS

Xenon II is quite different from its vertically scrolling peers in that it's actually possible to scroll the screen backwards. This comes in handy for running away from any nasty alien legions that could spell your doom. Later levels have more than one route to the end, or even dead ends, forcing you to go backwards and retrace your steps

SOFTWARE CLUB

# RANGERS

▲ Plenty of crate-related laughs in store here.

▲ Watch out, or that Kangaroo'll aptal you with his ball!

## CHIP OR DALE, THAT IS THE QUESTION

Rescue Rangers is a one or two-player game, which means that both Chip and Dale can fight evil together. If you're on your own, you've got the choice of either Chip or Dale (both seem to have virtual identical characteristics).

## CRATE FUN FOR ALL

Chip and Dale may be small, but they're not defenceless. Many crates and discarded apples litter the landscape, and either of our rodent chums are capable of lifting these items and hurling them at their enemies. As if this weren't enough, smaller objects such as crates and breeze blocks can be ducked behind to provide shelter from marauding baddies.

▲ Looks like Dale's boxed himself in just as he reaches the exciting light bulb level.

▲ Is it Gary's mother?

## BRAIN-RELATED HANKY PANKY

It's not all reflex-related action in Rascas Rangers - there are also puzzles aplenty. For instance, to pass one part of the Laboratory level a giant beaker must be negotiated. This piece of glassware is far too high to jump, but eagle-eyed players will notice the line of three blocks next to it. The trick is to pile the blocks into a tower, thus making passage simple! Other puzzles include such horrors as learning how to turn off a multitude of traps by the use of skillful jumps.

## TOP ICON BONANZA

Crates are very useful for obstacle purposes, but there's more to them than that. Secreted in many of them are bonus-giving icons. Flowers grant extra points at the end of the level, moons replenish your energy and stars grant extra lives should enough be collected. If you're really jammy, you might even run across bonus twinkly stars! These items float across the screen at random times and reward the collector with a handy 1 up!

## COMMENT

### RAD

Rascas Rangers is good enough to stop it getting lost in the crowd. The graphics are quite good, with small but detailed sprites and cartoony robots. The sound is adequate too, with a decent rendition of the Rascas Rangers theme playing throughout the game. But what sets Rascas Rangers apart from other NES platformers is the speed of gameplay and the level of challenge. The game is really fast-paced with Chip and Dale zipping around the screen at a great rate of knots. It's also one of the most difficult Nintendo platform games to date; the action never lets up and keeps you constantly on your toes. Chip and Dale is a recommended purchase, providing you're not yet tired of platform games.

# RESCUE RANGERS

BY: CAPCOM

PRICE: £34.99

RELEASE DATE: FEBRUARY

GAME DIFFICULTY: MEDIUM

LIVES: 3

CONTINUES: 3

SKILL LEVELS: 1

RESPONSIVENESS: RATTY QUICK

1-2  
PLAYERS

## PRESENTATION 76%

Character selection and lengthy story unfolding between levels, but no options.

## GRAPHICS 81%

Small but detailed cartoon-style sprites. The scrolling is very smooth and the animation is pretty decent.

## SOUND 72%

The theme tune is accurate and true to the original cartoon series but tends to grate after a couple of sessions.

## PLAYABILITY 88%

Fast moving and very addictive from the start with lots to see and do.

## LASTABILITY 87%

Each of the many levels is long and packed to the gills with challenge - platform fans should be in their element!

## OVERALL 88%

Not groundbreakingly original, but very good nonetheless. Fun to play and long-lasting.

REVIEW

The Dark Zone, once known for its complete lack of crime, has been invaded by a gang led by a strange criminal overlord known only as M. The police, suddenly overwhelmed by the crime wave, are not surprisingly completely powerless. This doesn't stop one particularly hard cop, Sergeant Brody, attempting a one-man assault on the overlord's criminal infested zone, he is immediately blown away by an Uzi-wielding, sharp-shooting maniac. Such is life, and indeed death, for that matter.

His best friend and partner, known only as Sergeant Gray, witnesses the brutal murder and attempts to do something about it. Using his martial arts skills and tough cop training he decides to avenge his dead chum by infiltrating all five of M's bases, kicking the waste products out of his prisons and finally facing up to M himself in a horrific final conflict.

The actual gameplay is pretty simplistic. The player controls Gray, who runs around the horizontally scrolling platform landscapes using his punching and kicking skills on the chins of the various criminals who accost him on his travels. This may sound pretty good, but M's been expecting something like that and he's placed his best henchmen at the end of each level. They're just itching to kick Gray's ass up and down the many streets that make up the Dark Zone...

▲ Gray is able to whip out his firearm at will!

RUNNING

▲ Sergeant Gray ducks to avoid enemy fire. Perhaps now he should beat up his assailant?

COMMENT

Running Battle's special suits, different weapons and beat 'em up action may sound like a recipe for a superb game, but unfortunately it's all half-baked. The sound is a ghastly booming cacophony, the background graphics are rubbish and the animation on the poorly-drawn sprites is wooden - the only decent bit is Sgt Gray's laughable epileptic fit attack that masquerades as a special move. And to cap it all, the gameplay is very poorly designed. During the level the badies are completely pathetic and offer no resistance, whereas the end-of-level bosses are really tough, which makes play very frustrating and annoying. When it comes to the crunch, Running Battle seems to be half finished. With some graphical and gameplay tweaks it could have been pretty neat, but sadly it's not to be and the end product is a mediocre, irritating and horrible-looking beat 'em up which falls well short of its potential.

JULIAN

SUPER SUITS ON A STICK

Should you chance across a fine SS Icon, Grey is immediately endowed with a Super Suit. This boosts his attack strength fourfold, and makes his defensive moves twice as effective. The best icon to find is marked SR. The effects of this are dramatic. Grey's running speed becomes near lightning speed and he won't fall through holes in the scenery! As an added bonus, Grey is also invincible and enemies die on contact. Watch it though - there's a strict time limit for your killing spree.

▲ Leaping enemies accost Sergeant Gray in this fun-filled, action-packed adventure.

# BATTLE

BY: SEGA

PRICE: £29.99

RELEASE DATE: NOW

GAME DIFFICULTY: EASY/MEDIUM

LIVES: 3

CONTINUES: 3

SKILL LEVELS: 1

RESPONSIVENESS: ACCEPTABLE

## COMMENT

Running Battle ranks as one of the most desperately average games I've ever played on the Master System. The graphics are well-defined, but the final visual effect is very

### RICH

dull. The sound is predictably dire with awful tunes and uninspiring effects. Even in the gameplay stakes, Running Battle is lacklustre. There are only three attack moves, making the action repetitive and dull. I must admit that the "special" move (I think it's supposed to be multiple mid-air kicks to the face) made me laugh out loud - it looks as though your character is having airborne convulsions! Only the end-of-level bosses pose any serious threat to our stilt, almost unanimated hero - and they seem to dust him almost immediately. It's all a bit of a shame really because the Master System has been crying out for a decent beat 'em up and this definitely isn't it.

## SHOOTING WEAPONS

Located around M's stronghold are two different types of powerful weapon. The 9mm Beretta is very common on the earlier levels, and comes with thirty bullets (rather than fifteen in the magazine and one down the pipe like the real thing). If you're lucky, you should be able to get hold of the Uz4-4s bullets are far more powerful, but only ten rounds are supplied.

## PRESENTATION 42%

Running Battle is lacking in this department, with little in the way of options or pretty screens to look at.

## GRAPHICS 55%

Visually, the game is pretty ropey with very dull backdrops and lacklustre animation.

## SOUND 39%

Awful, unatmospheric music warbles along to the violent proceedings, with dull effects making up the rest of the soundtrack.

## PLAYABILITY 59%

Running Battle seems quite a laugh to begin with, but with only three attack moves it quickly gets boring.

## LASTABILITY 51%

Five levels of average, unexciting action won't keep you glued to the Master System for very long.

## OVERALL 54%

A disappointingly average beat 'em up which falls well short of its potential.

# ACE

## TWICE THE ACTION!

X2X

Everyone's favourite multi-format games magazine doubles its action factor next month with a stunning front cover disk catering for PC, Amiga and ST owners. A thrilling blend of demos and complete games, the disk will reflect Ace's determination to deliver the earliest news of the hottest games, giving you the chance to sample and play the latest releases on your own machine - what better way to get a taste for that new title?

## TEN TIMES THE EXCITEMENT!

X10X

ACE continually leaves the competition standing by running exclusive pictures, previews, development reports and Tricks and Tactics on the games that YOU want to know about.

We provide a breadth of coverage unavailable in any other magazine, reviewing and rating EVERY major new release with handy at-a-glance icons and scores. Each issue carries reviews for more than a hundred currently available titles.

## A HUNDRED TIMES THE DEPTH!

X100X

The best games of the month receive the special ACE Screen-test™ treatment, a glorious SIX-PAGE examination of all aspects of the title, detailing plot, action, difficulty, longevity and (most importantly) entertainment value in more depth than any other magazine on the market.

After his first accidental foray into the world of continuum-hopping, there's been no stopping Marty McFly. Whether it's buying sporting d'manacs from the future to make lots of dough in the past, playing heavy metal concerts in the 1950s or even changing the course of history itself, Marty has got what it takes to be a true time traveller.

In this game, based around the third and final part of the Back to the Future film trilogy, Marty goes back to the 1880s to rescue his pal Doc Brown who was accidentally sent back to that era when his time-travelling DeLorean was struck by lightning. Along the way, Marty also has to thwart the evil ways of Mad Dog Tannen's gang, headed by an ancestor of Marty's arch enemy, Biff!

Back to the Future III adopts the familiar game-of-the-film format with each level representing a different scene from the film. There are four levels in all, the ultimate one being a ride atop a speeding train as Doc and Marty attempt to get the DeLorean up to 88 mph so they can make the final time jump home.

# BACK TO THE FUTURE III

← Marty's on the werpath...

## LEVEL ONE

Calamity has struck! A buckboard carriage being driven by school m'ain Clara Clayton is out of control and is about to crash off a nearby cliff. Controlling Doc on his trusty steed, the player must stop her from plunging to her doom. Making life difficult are a veritable hail of deadly household objects flying off the cart, as well as hazardous ravines and bushes!

## LEVEL TWO

Having saved Clara Clayton, Marty's got his sights set on showing off his lap marksmanship abilities in the shooting gallery. There are loads of targets to shoot, and Marty must blast the requisite amount to be able to progress to level three.

▲ Pie-slinging antics afoot!

## COMMENT

Back to the Future III is an instantly playable game that should go down well with fans of the film. Each of the four levels tests your arcade skills very differently, from the instant reflexes needed when you're chasing after Clara's runaway carriage to the pinpoint accuracy required for the shooting gallery. On the whole, the graphics are pretty good, with the Wild West atmosphere captured perfectly.

## RICH

The sprites and backdrops are all well defined, and the animation is good too. What I didn't like much about the game was the rather naff music and the lack of levels. It didn't take me more than a day or so to see the whole game and I couldn't help wanting a lot more from the package. It's also a bit of a cheek asking Megadrive owners to pay ten quid extra for what is basically an Amiga game that retailed at £25.00. If it's variety in your gameplay you're after, Back to the Future III scores highly - but it's just too easy to see everything the game offers.

# BACK TO THE FUTURE III

▲ Marty's getting pretty angry now.

## LEVEL THREE

Mad Dog's gang are roved up in town and Marty must bring them all to justice. The only problem is that the gang are armed with guns and all Marty has is a great pile of frabbee pie dishes!

## LEVEL FOUR

The final level is set atop a speeding train which is pushing along the DeLorean time machine. Hazards abound as Marty collects the charges which are required to get the train up to 88mph and thus return the heroes to the present day.

## COMMENT

## JULIAN

I must admit that I really enjoyed playing this. The four different levels are varied and fun, particularly the pla dish aling third level, and I found myself constantly going back for another shot. The problem is, though, that it doesn't take more than a day or two to go through the entire game, and once you've done that the appeal starts to wear off. If there had been more levels, this would have been a superb film tie-in. The graphics and sound are both good, and as I've already said, it's a great fun to play. However, its lack of challenge means that only Megadrive beginners will really get their money's worth.

▲ Shoot the objects around the edge for extra points.

▲ Watch out Marty!

SKILL LEVELS: 1

RESPONSIVENESS: GOOD

## PRESENTATION 76%

Amusing intermissions, but no options. In-game presentation is smart.

## GRAPHICS 84%

Some great sprites and animation throughout.

## SOUND 80%

A selection of good quality tunes and frontier-world style effects accompany the action.

## PLAYABILITY 86%

Very addictive at first, with the four levels offering plenty of varied and highly enjoyable action...

## LASTABILITY 61%

...but once you've completed it (which doesn't take that long), the appeal starts to wear off.

## OVERALL 77%

A varied and thoroughly enjoyable film tie-in which is let down only by its lack of lasting appeal.

Orders Placed Before 4PM Will Be Despatched The Same Day  
Trade Enquiries Welcome

The icons are ignored as the players indulge in fistcuffs.

**S**peedball's back! After a hundred years of absence, the most violent sport ever devised by man has bounced back - and this time it's twice as deadly!

Like the original Speedball, the game's authorities have left all of the rules and referees out, which generally ensures that plenty of entertaining, physical violence is the order of the day. No matter how violent a game may be, there's got to be an objective. In Speedball 2 it's scoring points, and the most usual form of this pursuit comes from scoring goals in the opposition's 'net'. But as you'll read later on, there are quite a few more telly-toting techniques to discover.

In addition to the smash, grab 'n' score antics of the actual game, Speedball 2 also puts you in the role of team manager. This means that you supervise each player's training programme, as well keeping an eye on the transfer market for any Luneker-esque goal scoring star players. Training and new players are paid for with the prize money you receive from each game played.

You start the game with your team, Brutal Deluxe, flogging at the bottom of Speedball Division Two. Using your skills and judgement, it's your job as player manager to get to the top of Division One - and stay there!

# SPEEDBALL

## GO FORTH AND MULTIPLY

Scoring points is the aim of the game and you can boost your goal-scoring potential many times by lobbing the ball through the score multipliers located on either side of the Speedball pitch. Goals are usually worth ten points, but with the aid of the multiplying mechanism, up to fifty points are there for the taking!

## COMMENT

Speedball 2 is one of the finest arcade games ever played, and apart from minor sonic differences, this Megadrive version is exactly the same. All the fun of basting up a legion of enemy players and scoring a goal after gratuitously assaulting the goalie has you playing on your 16-bit machine for ages! I also like the way that scoring points isn't solely reliant on getting the ball past the opposing goalie. All of the score multiplying and star-spangling makes for some exciting action in the mid-field area as well as at each end. The graphics and sound are good, serving their purpose well, and with all of the different game options, there's tons here to be getting on with. As fast-action violent games go, Speedball 2 is excellent, with only EA Ice Hockey basting it in the entertainment stakes.

## RICH

## IT'S A KNOCKOUT

There are three main game types in Speedball 2. The knockout game gives you a chance to go for the coveted Speedball cup by taking part in a series of elimination games. But beware, for if you lose one game you're out! The league option puts you in a duel division league environment, where reaching the top is your ambition. The final option is the usual two-player mode, where two human Speedballers battle it out for sphere-related supremacy!

# SPEEDBALL 2

## ICON MOVE ANY MOUNTAIN

During the game itself, icons pop up from time to time. Collecting these can boost your speed, stamina and performance. Other icons have instantly detrimental effects on the other team, by immobilising them or draining stamina. If you really feel like annoying your opponent, collect the reverse controls icon!

## REPLAY!

After a goal has been scored, the action instantly cuts to a slow-motion replay of the last few seconds of the match. This is a pretty gratuitous feature of the game, but does come in handy for showing off, or humiliating your opponent in a two-player game.

## COMMENT

Speedball 2 is a superb future sports simulation that combines extremely fast and addictive gameplay with plenty of violence. It's one of those games

that's very easy to pick up and play, but has the potential to let experts learn some amazing tricks and tactics. Like all sports games, the two-player mode provides the most fun (you just can't help screaming and shouting at your opponent - especially when play starts to get dirty), but that's not to say that single-play action is dull. Not at all - the computer opponents pack a hefty punch and the management section adds a whole new angle to the game. With its excellent graphics and superb gameplay, Speedball 2 is a long-lasting and thoroughly enjoyable sports simulation that should definitely be checked out.

WELCOME TO  
CONDITIONING

Between each game, you're whisked away to the conditioning room where money is spent beefing up your players' abilities. However, as you can see from this screenshot, ordinary players' abilities can never reach 100%. You've got to buy a star player from the transfer market to see some truly exceptional skill.

▲ A piss meds in desperation!

▲ The ball is instantly intercepted!

▲ The player's performance is ridiculed in print.

▲ John Connor makes the Terminator swear not to kill anyone.

# TERMINATOR 2 JUDGMENT DAY

## THE STORY

Los Angeles may once have been a vast, sprawling built-up area humming with activity. But after August 29 1997, it's an unforgiving desert littered with the burnt-out debris caused by the nuclear war called Judgment Day. From the ashes of the atomic blast rose the Hunter Killer and Terminator machines, manufactured by the megalomaniacal computer Skynet. Their purpose was simple: to eliminate Skynet's only remaining enemies, the survivors of the holocaust.

Unfortunately, Skynet's plans were foiled by one man, John Connor. He banded the survivors together and launched a devastating counter-attack against Skynet, destroying its main control complex. Almost crippled, Skynet attempted one last desperate gambit. It sent two Terminator machines back in time to destroy John Connor's very existence and thus change the future. In both cases, Connor was able to send a lone warrior back through time to counter the menace.

The first Terminator was sent back to 1984, with John's mother, Sarah, targeted for termination. It failed. The second, deadlier T-1000 machine (that can mimic the appearance of just about anything it touches) was sent back to strike at John Connor himself when he was still a child. In a bid to protect his past from this horrific machine, Connor captures and reprograms a Cyberdyne Systems model T01 Terminator, similar to the one sent to pursue Sarah Connor in 1984. Its mission: to protect the would-be world saviour...

▼ The T-1000 has John Connor targeted for termination.

## COMMENT

JULIAN

It's a complete mystery to me why the programmers of this didn't copy the game design of the Gameboy version. Its varied, multi-level gameplay follows the plot of the film perfectly and makes for a gripping, atmospheric game. This Nintendo version undoubtedly looks and sounds very slick, but features different gameplay which has less levels and variety than the Gameboy version! It's fairly fun to play, but when it comes down to it, Nintendo T2 is a very standard platform game and its five levels offer only a moderate challenge and feature little in the way of thrills and spills - a real shame when you consider the immense potential given by the film's unbelievable out-and-out action! There are plenty of better platform games available on the NES, so unless you're absolutely desperate for a T2 game, ehup around before you buy.

THE BATTLE FOR  
TOMBDRAGON BEGINS  
TODAY...

▲ The Terminator means business!

## COMMENT

After the pretty excellent Gemcom version of *Terminator 2*, I was expecting a more in-depth, colour version of the same game for the trusty ol' Nintendo. I ended up being rather disappointed.

Although there are five levels, there are only three different styles of play - with none of them being that interesting. The most common is a simple search through a

platform environment, shooting people who get in the way. At the beginning and end of the game you're treated to dull platform action, where the Terminator indulges in limited fist-related beat 'em up action. Perhaps the most impressive level is the isometric 3D flood channel stage - but this does not take too long to complete et al. As a film tie-in, T2 is extremely disappointing, with too few stages that just aren't varied or exciting enough to make the game worthwhile.

## I NEED YOUR CLOTHES AND YOUR MOTORCYCLE

The Terminator arrives at a seedy highway truck stop, where he is immediately set upon by a gang of thugs. A bit of fistcuff action follows and once the threat has passed, the Terminator's targeting system is invoked. First of all, a motorcycle is required. A nearby tavern provides the goods, after yet more fist-related tomfoolery. The next priority is to find John Connor.

## MY MISSION IS ... TO PROTECT YOU ...

The Terminator has located John Connor speeding along the Los Angeles flood channel on his souped-up motorcycle. The T-1000's in hot pursuit though - at the wheel of a massive truck! Using his Harley Davidson motorcycle skills, the Terminator must negotiate the many hazards of the flood channel and rescue John before the T-1000 runs over the defenceless lad.

## RICH

people who get in the way. At the beginning and end of the game you're treated to dull platform action, where the Terminator indulges in limited fist-related beat 'em up action. Perhaps the most impressive level is the isometric 3D flood channel stage - but this does not take too long to complete et al. As a film tie-in, T2 is extremely disappointing, with too few stages that just aren't varied or exciting enough to make the game worthwhile.

# COME WITH ME IF YOU WANT TO LIVE...

Rescuing Sarah Connor from the clutches of the state mental hospital is John's first wish, and the Terminator is ordered into attempting the rescue bid. Unfortunately, the T-1000's tactical computer anticipates this move. This level is a race against time to find Sarah Connor before the Terminator is overpowered by the hospital authorities and the poly-mimetic alloy T-1000!

# I HAVE DETAILED FILES.....

Only by destroying the research Cyberdyne Systems has carried out into a revolutionary microprocessor can the future be saved from the horror of Judgment Day. This entails the Terminator running around the Cyberdyne building in a similar manner to the hospital level, shooting guards (in the legs, of course) in a bid to steal the remains of the machine that terrorised Sarah Connor in 1984!

# HASTA LA VISTA, BABY.....

Cyberdyne is history - but the T-1000's mission parameters are still active and John Connor remains in dire peril! Our heroic gang hole up in an abandoned steel mill - and the T-1000's close behind. Therefore it's the Terminator's job to duff up the liquid metal killing machine. Only when the danger has passed can he self-terminate and banish all probability of Skynet ever causing the holocaust.

**BY: ACCLAIM**

**RESPONSIVENESS: GOOD**

## PRESENTATION 93%

Completely brilliant. Great Terminator red-out eye-view screens and well-drawn cameo graphics of the main characters.

## GRAPHICS 88%

The backdrops are recognisable from the movie, and the sprites are all well-defined with decent animation.

## SOUND 83%

Although the excellent film score is missing, T2's tunes are very atmospheric indeed.

## PLAYABILITY 77%

Easy to get into, but the simplistic gameplay of each sub-level could put you off pretty quickly.

## LASTABILITY 69%

The stages aren't varied or thrilling enough to keep you glued to the console for very long.

## OVERALL 72%

Possibly the greatest film licence ever is wasted on a fun, but ultimately shallow game.

FOR A MAGICAL WORLD OF FUN & GAMES **FANTASIA**

# AMERICAN FOOTBALL SPECIAL

If you've just watched and enjoyed the Superbowl and want to indulge in your own orgy of gridiron violence, why not grab yourself a American football console game? To help you make that all-important choice, MEAN MACHINES brings you the Ultimate American Football Game Guide!

## NINTENDO

### TEN YARD FIGHT

There are plenty of Nintendo American football games available in the States, but so far the only one to make it across the Atlantic is this conversion of the ancient 8 year old from coin-op. Rather than being an accurate emulation, it's a simplified four-level arcade-style version of the sport. It's a basic, but fun game. The graphics and sounds are rudimentary to say the least, but the simplified gameplay means that even a complete American football novice can quickly learn how the sport works.

GRAPHICS	68%
SOUND	61%
PLAYABILITY	78%
LASTABILITY	73%
OVERALL	74%

## GAMEBOY

### NFL FOOTBALL

The only American football game currently available at the moment, and eedly it's not very good. Despite the wealth of play options and a two-player mode, the gameplay is so slow and the graphics so small and blurred that you simply cannot see what's going on and the game swiftly becomes very frustrating. A real shame.

GRAPHICS	41%
SOUND	60%
PLAYABILITY	49%
LASTABILITY	31%
OVERALL	40%

## MASTER SYSTEM

### AMERICAN PRO FOOTBALL

By far the finest 8-bit American football game available on any system, American Pro Football is absolutely superb, with tons of play options available, well graded difficulty settings and highly enjoyable and very addictive gameplay. An absolute must for American football loving Master System owners.

## GAME GEAR

### JOE MONTANA FOOTBALL

Virtually identical to the Master System version from which it was developed, Joe Montana Football suffers from similar problems. The graphics and sounds are alright, but the big problem is with the gameplay - it's far too easy and it lacks depth and excitement. American football fans on the move might want to give it a go, but we think you'd be better off buying Master System American Pro Football and a Wide Gear so you can play it on your Game Gear.

GRAPHICS	68%

OVERALL	93%
GRAPHICS	90%
SOUND	83%

### MEGADRIVE

#### MIKE DITKA'S POWER FOOTBALL

Looking like a cross between John Madden's and Joe Montana, Mike Ditka's is a fairly enjoyable American football game which looks and sounds very slick but is ultimately let down by its lack of depth and rather unresponsive controls. It's a simple game to get into, but at the end of the day you'd be better off buying the more sophisticated John Madden's - it might be harder to get to grips with, but you'll be playing it for months longer than this.

GRAPHICS	81%
SOUND	86%
PLAYABILITY	78%
LASTABILITY	76%
OVERALL	78%

#### JOE MONTANA FOOTBALL

Although it looks impressive, Joe Montana Football is let down by its unthrilling and unchallenging gameplay. The two-player mode is

a little bit more fun, but even then the action simply doesn't offer enough depth or variety. If you want gridiron thrills 'n' spills, check out American Pro Football instead.

GRAPHICS	64%
SOUND	69%
PLAYABILITY	66%
LASTABILITY	62%
OVERALL	65%

#### GREAT FOOTBALL

Suffering exactly the same problems as Joe Montana Football but even more so, Great Football is a limited, ugly-looking game which offers little in the way of excitement. Buy the far superior American Pro Football instead.

GRAPHICS	61%
SOUND	58%
PLAYABILITY	61%
LASTABILITY	53%
OVERALL	55%

## MEGADRIVE

### JOE MONTANA'S FOOTBALL

Joe Montana's Football on Megadrive is a complete pushover and the limited amount of plays means that the game is very quickly mastered and becomes dull soon after.

GRAPHICS	84%
SOUND	84%
PLAYABILITY	76%
LASTABILITY	56%
OVERALL	69%

## SUPER NES

### JOHN MADDEN'S FOOTBALL

The version currently available on Inport is surprisingly disappointing. Compared with the original Megadrive version it looks unfinished and suffers from flickery graphics. The gameplay, although fun, is also a bit rough around the edges. Electronic Arts are aware of these criticisms and are currently reprogramming the game for official UK release later on this year. Our advice is to hang on until then, rather than buy this version.

### JOE MONTANA'S SPORTSTALK FOOTBALL

Rather than tackle John Madden head-on, Sega have taken an unusual approach with this one and the end result is a stunning showpiece game. Containing the most speech ever heard in a videogame, Sports Talk football gives you a full commentary as you play! The effect is astounding and is guaranteed to reduce even the most ardent Amiga owner into a gibbering wreck. The gameplay is simple but enjoyable, and the game is recommended to players who already have John Madden's in their collection.

GRAPHICS	81%
SOUND	96%
PLAYABILITY	85%
LASTABILITY	80%
OVERALL	83%

### JOHN MADDEN'S FOOTBALL

The original stunner, this is simply an astonishing American football game. It's since been superseded by John Madden's Football '92, but at its reduced price of £29.99 it's still well worth a look if you can't quite scratch to the £39.99 price tag of John Madden's Football '92.

### JOHN MADDEN'S FOOTBALL '92

John Madden's Football '92 features superb graphics, sound and presentation and stunning gameplay. All the thrills and

GRAPHICS	94%
SOUND	95%
PLAYABILITY	95%
LASTABILITY	92%
OVERALL	93%

excitement of the sport has been captured in the graphics and the end result is THE finest American football game available on any system. An essential purchase.

GRAPHICS	95%
SOUND	94%
PLAYABILITY	96%
LASTABILITY	94%
OVERALL	95%

Shown at the Winter CES Show in Las Vegas, this is a more arcade-style game. The graphics and sound are both superb and the gameplay is looking promising. Expect a full report in Spring.

From the Arcade Classic

# MARBLE MADNESS

Converted from the massively successful Atari coin-op, Marble Madness casts the player as a marble out to win a number of races set on a scrolling isometric 3D environment.

There isn't exactly much in the way of competition. Your objective is just to beat the clock and finish the race before the timer reaches zero. This might sound simple, but making matters more difficult are the sheer amount of hazards to be overcome. The marble responds realistically to the contoured terrain making half of the challenge keeping your marble rolling in the direction you want it to. Different surfaces, like ice, for example, make keeping control even more difficult.

But perhaps the most dangerous obstacles are the living creatures that inhabit the Marble Madness domain. The most common are black marbles that attempt to berge you off the edge of the course. Other hostile creatures come in the form of acid pools that literally burn your sphere away into nothingness. Later levels introduce even more varieties of lethal alien beings - and dusting your oib-like posterior is their idea of a good time.

There are six levels of exciting bowl-shelteringly exciting action in Marble Madness. Do have the amazing gift of video game dexterity required to overcome the odds and conquer the game?

▲ This second level is a cinch.

▲ Those ramps should help.

## COMMENT

**JULIAN**

Lika Gauntlett it, reviewed elsewhere in this issue, Marble Madness is a black and white replica of the coin-op. All the features of the original have been packed in, and the end result is a superb game which'll keep you coming back constantly to try and beat your score! An excellent game that's a must for portable gaming freaks.

## COMMENT

**RICH**

mazing as may sound, this is a landscape conversion of Marble Madness is virtually antial to the coin-op in terms of graphics and playability. Although there are only six levels, it's so fun to play, you'll still come back for more. A great Gameboy purchase!

▲ GOAL! You've done it!

## ARCADE COMPARISON

As you can see by comparing the screenshots, Gameboy Marble Madness is visually identical to the coin-op original, the only difference being that the graphics are monochrome. Also, the arcade machine had a simultaneous dual player option and trackball controllers.

A line and of Super Mario Bros III. Mario and Luigi succeeded in dealing an almost fatal blow to their arch nemesis, Bowser the Koopa King. But being the cunning little devil that he is, Bowser escaped and headed to the mountains to recover and plan an evil vengeance of terrifying proportions!

Hailed as heroes by the liberated Mushroom minions, Mario and Luigi thought that they had finally defeated their most feared foe. Obviously, they were both a tad shocked when Bowser returned to the scene with seven new Koopa Kids and proceeded to take over the entire Mushroom World! But not only that, Bowser eluded the Mario Brothers by once again abducting the beautiful Princess Mushroom AND taking the seven priceless Mushroom Eggs - Mushroom World's priceless heritage!

Once again, it is down to Mario (and Luigi in two-player mode) to traverse the scrolling platform levels that make up the Mushroom Worlds, taking out the various minions that Koopa has left behind. The overall objective is to undo the majority of the damage Koopa has done by infiltrating the strongholds of the Koopa Kids, dusting their menkey asses and recovering the Mushroom Eggs they have hidden. This paves the way to the far of Bowser in his secreted mountain hideout, known as the Koopa patch. Then it's the familiar Final Confrontation: Mario versus Bowser in an all or nothing battle to the death!

U 100 4 100

POINT OF ADVICE -  
You can hold  
extra lives in the top  
three of the top three  
rows of the screen. Press the  
SELECT button.

▲ Useful advice is dotted throughout the game.

## THE MAP OF MARIO

Travelling between each mini-level is accomplished on this large scrolling map. Simply move Mario to the destination of your choice and press the button. However, you can't just select any level. Only by completing the mini-levels do you open up the paths leading to more stages!

## 4

## A FUNGI TO BE WITH

Mario's into mushrooms in a big way - and it's not surprising considering what they do to him! Collecting a green spotted mushroom, for example, endows Mario with an extra life. Red spotted fungi has far more dramatic results - they make Mario grow to double his normal size, and open up a range of power-up weaponry to the lucky Italian plumber!

▲ This underground level would appear to be a boy Mario...

## JUMPED BY MARIO

As if you didn't know, Mario's primary form of attack comes in the form of his devastating jumping prowess. Simply by jumping up in the air and falling on his prey, Mario instantly dufts up most Koopa minions!

However, some of Bowser's pals are a bit clever, and repel the Mario assault by having spiked skin or even being on fire!

# SUPER MARIO BROS. 4

▲ Mario vs Bowser!

Just about every creature in the Mushroom Lands has been turned against Mario, with the exception of a race of dinosaur-like creatures. Should Mario clamber atop one of these cuddly, reptilian beings, he's able to ride it along, and use its amazing gobbling abilities to consume any Koopa meense in his path! These useful creatures come in many different shapes and sizes - some of them even have wings, enabling Mario to take to the skies!

## GREAT BALLS OF FIRE

Collecting a special flower has a strange effect on our plumbing hero. Its herbal effects dye Mario's dungarees white and he's able to fire bouncing fireballs at his unsuspecting prey! This comes in handy for slapping Koopa minions about in a confined space where there's no room to jump and squash the meemies.

## SUPER MARIO!

Special leaves that Mario collect turn him into Super Mario - complete with cape! With this wondrous item, Mario is able to fly and thus get to previously unreachable platforms. These could lead to secret levels and bonuses!

▲ Mario can travel on both sides of the fence!

## SUB AQUA MARIO

Some levels of *Mario IV* are staged completely under water. Being a bit plump, Mario isn't best suited to this change of scene. The water inertia generated by the water makes his movements a lot more sluggish, and if he doesn't keep up his breast stroke, he falls to the bed of the river/ocean (depending on the level) and drowns! But if Mario is particularly lucky, he might find a special block that, whilst carried, speeds him up and makes him more agile too!

► *There are plenty of water in the undersea levels.*

## A KICK IN THE GHOULIES

Dotted around the map are various ghost houses. These are very helpful to Mario because once he's beaten all of his undead minions of these unsavoury places and reached the exit, he's immediately eligible to save his game! Saving the game preserves the amount of levels you've discovered. Can you locate all 96 levels?

## REVIEW

## END OF LEVEL THRILLS

At the end of each mini level, Mario is confronted by a rising end falling crossbar, suspended between two poles. This is a chance for our hero to earn bonus lives. By jumping up and touching the bar he receives a meaty bonus in the form of stars - the higher it is when he touches it, the more stars he gets! Every time Mario collects 100 stars he enters a bonus game where he can earn extra lives & plenty.

## COMMENT

## RICH

*Mario IV* is a game to give away with the Super NES Nintendo have created a giant roller coaster of a cartridge here, packed with masses of challenges, scores of secret rooms and what can only be described as almost perfect playability! *Mario IV* is quite similar to its 8-bit predecessor in terms of gameplay, and the completely brilliant control method that made *Mario III* so intuitively superb also returns. The little dinosaur that Mario runs around on is also a delight, adding a new dimension of gameplay to the concept. What is perhaps the most breathtaking aspect of this game must be its sheer depth - completing the game shouldn't take very long at all, but it's in finding all 96 levels that the game really gets you coming back for more. There's just so much to see and enjoy in this game, I guarantee that you'll be hooked for months! Here at MEAN MACHINES, we've seen every Super NES game there is, and *Mario IV* remains the most superb game on the system, and gives Mario til a good run for its money in the "Best Video Game Ever" stakes!

REVIEW

COMMENT

▲ This test grants flying abilities!

JULIAN

Back in October said that Super Mario III was the finest videogame I'd ever played. Ask me now and I'd tell you a different story! Yes, there's a new "greatest game" in town, and it's called Super Mario IV. There might be games with better graphics and sound, but in the all-important playability stakes this is the King. The perfect-landing control system, beautifully balanced difficulty level, outstanding puzzles, immense long-lasting appeal and loads of undiscovered secrets make this the most addictive, rewarding and enjoyable game yet seen. To put it simply, Mario IV is the ultimate videogame experience the only bad news is that if you want to test its excellence, you've got to go out and buy a Super NES!

EXPERTS ONLY!

The real test for Mario IV players is to complete the Star Worlds hidden deeply in the game. Each of these tests an aspect of your Mario abilities, be it your jumping accuracy, flying skills or just your reactions in general. Complete every one of these Star Worlds and you're given a special congratulatory message - and not only that, the majority of the enemy sprites are completely altered! To show that this change has occurred the main map's colour scheme is altered to tasteful pastel shades!

▲ Bewigged from all girls! Watch 4, Mario!

▲ A legion of meanies accost Mario.

PRESENTATION 93%

There are loads of excellent little graphical touches and a completely fab control mode

GRAPHICS 91%

Perfectly defined and superbly animated sprites along with excellent backdrops

SOUND 93%

The Super NES remixes of the distinctive Mario themes are great and the spot affects are superb

PLAYABILITY 98%

Mario IV immediately grabs you with its highly enjoyable, challenging, frustration-free gameplay.

LASTABILITY 97%

Completing the game is pretty easy, but it's finding all 96 levels that makes this one of the longest lasting Super NES games

OVERALL 98%

The greatest 16-bit platform game yet devised - and it's FREE when you buy a Super NES!

You don't have to be Einstein to get  
the most out of your Amiga with...

# AMIGA

CU Amiga offers you easy access to all the possibilities that your Amiga holds. Packed with a breadth of coverage beyond games, CU Amiga delivers -

- The ultimate peripheral coverage. Extensive, clear guidelines on what's available, how you can use it and what's best to buy
- Unsurpassed hardware coverage. CU Amiga was the first magazine to regularly feature CDTV.
- The best buyers guide. At least 33 pages packed each month with all the information about what's best
- 60 non entertainment products put under the microscope each month
- 100+ games reviewed every month.

Beyond games with...

**CU** AMIGA

After hundreds of years of interplectic wars end such, the universe is finally at peace, with twelve major races sharing the universe in harmony. Each of these races is led by a champion of such supreme hardness that even Mr T would shake in his jewelry were he to face but one of them.

Everything is hunky-dory until the Dark Lord Vasuta, leader of the underground world of Dominion makes his presence felt. In the tradition of the Fighting Masters, he challenges each one to single combat and defeats all but the last, that being you. You must now battle your way through the other eleven enselad Masters to reach Vesule and bring order to civilization once more.

What this boils down to is a series of one-on-one combats in a variety of planetary arenas. Each Master has a number of individual moves available to him, her or it, depending on the individual capabilities of their race, and these advantages must be tactically pitted against the weaknesses of your opponent to ensure maximum scrapping success.

**DIO**

HEIGHT: 5'5  
WEIGHT: 220 LBS  
ATTACK POWER: 5  
SUPLEX POWER: 32

You might be excused for thinking Dio is a complete vegetable - because he is! He's also one of the least likely contenders for Fighting Master! His supreme speed and jumping abilities coupled with his jumping foot-smash and awesome Venue fly trap chomping move make him a good choice if you don't mind low-power attacks. Take care against Morin though, as even Dio's reach is eclipsed by hers.

**EYESIGHT**

HEIGHT: 5'7  
WEIGHT: 242 LBS  
ATTACK POWER: 7  
SUPLEX POWER: 24

The blue boxer with the horns is Eyesight. He's the only creature not to have a throwing move, but makes up for it by having one of the hardest regular attacks. And even though his suplex power is low, his extendo-arm punch, rapid-fire face punch and rather hard Asterix-style uppercut will make you think he's twice as strong as he is.

**ELPHA**

HEIGHT: 6'0  
WEIGHT: 353 LBS  
ATTACK POWER: 6  
SUPLEX POWER: 33

This Elephantine combatant is an expert at trunk-related tomfoolery. If you're caught in the nasal appendage of this guy, you can expect to be thrown against the nearest side barrier quite soon. Either that or be tossed up in the air to meet with the shoulders of Elpha himself on the way down. Unfortunately, Elpha may be quite strong and possess a reasonable reach, but he is slow and limited in his fighting repertoire.

**ZRYGUNTE**

HEIGHT: 5'8  
WEIGHT: 242 LBS  
ATTACK POWER: 6  
SUPLEX POWER: 33

Insectoid features Zrygunte makes the most of his rock hard exoskeleton by crushing enemies with a spine-breaker similar to Goldrock's, as well as a chunky pile driver and aerial kick! He may sound like an ideal combination of Goldrock, Tomahawk and Flamer, but be warned, his reach is quite short and he's less than agile.

## REVIEW

## LARRY

HEIGHT: 5'7  
WEIGHT: 220 LBS  
ATTACK POWER: 6  
SUPLEX POWER: 33

Larry is Earth's Fighting Master and learned his trade by watching lots of WWF videos. As a result, he's on a wrestling par with that of Flamer, although Larry sacrifices speed for power.

## MEDUSA

HEIGHT: 5'1  
WEIGHT: 397 LBS  
ATTACK POWER: 6  
SUPLEX POWER: 41

Blubber-boy Medusa has a suplex power rivaled only by Dregon. This is used to best effect by pressing S while in a hold. The opponent will then be smashed repeatedly over Medusa's head and then be thrown into his nearest barrier. Wicked stuff!

## BARRIER SHEEN

During a fight, to ensure that neither of the contestants can chicken out and escape, barriers have been placed all around the fighting ring. Throwing an opponent into it gives them a severe electric shock and is a great way to reduce their life bars further than normal, so position your moves carefully to rack up the damage!

► *Morin's incredible tonfes of power rip into a bamused Bosowff! Morin is a fast mover, with a long-range attack.*

▲ *There's plenty of high-flying kicking action as Tomahawk unisshes a dsvsisting attack!*

## COMMENT

Fighting Masters is one of those games that provides a moderate amount of entertainment with single-player action but really comes into its own as a multi-player game. With two contestants battling it out it's fun, fun, fun all the way as you indulge in a veritable violence fest! Each of the twelve fighters has his or her own moves and characteristics, and experimenting to find which one suits your playing style is best is fun - my favourite is Dio (from the planet Trax).

## JULIAN

In one-player mode the game is easy (except the final boss, who's rock hard), but as I've said, the two-player mode is where this is best appreciated and if you've got plenty of opportunity to indulge in multi-player action, this is a must.

## REVIEW

▲ Baowoll's spinning attack slips straight into a bewildered opponent who can't block the stunning.

▲ Tomahawk grabs his prey and chucks him straight into the wall! Owww!

## COMMENT

## RAD

Once you get the hang of how to perform all the special attacks and such, Fighting Masters becomes much more fun. Even better is the two-player mode, which pits you against another human in a battle of both reflexes and tactics. If you're going to be playing on your own, forget it. Even on hard level the road to Valgasu is too easy, until you reach Valgasu himself, who is nigh on invincible. If you're usually going to have a second player around to beat up though, nab a copy now.

Fighting Masters is a classic example of one of those games you have to "get in to". To begin with, the shambling sounds, and comparative ease of the one-player mode make the going quite dull. However, there's always the compulsion to see what the other characters can do, and this sustains interest for long enough for you to get a feel for the controls. Once you get the hang of how to perform all the special attacks and such, Fighting Masters becomes much more fun. Even better is the two-player mode, which pits you against another human in a battle of both reflexes and tactics. If you're going to be playing on your own, forget it. Even on hard level the road to Valgasu is too easy, until you reach Valgasu himself, who is nigh on invincible. If you're usually going to have a second player around to beat up though, nab a copy now.

## GAUNTLET

## REVIEW

Take two medieval heroes and kit them out with swords, shields, and a sound knowledge of the mystic arts. Now you've got what must rank as a couple of the most powerful forces for good known in the world! Rather mysteriously, these heroes have been warped to the depths of the deepest dungeon in the land, and the only form of escape available involves doing battle with the host of enemies that infest each dangerous level.

The aim of each level is simply to find the exit in the eight-way scrolling maze. Not surprisingly, the regions of undead minions intend to make things a bit more difficult by knocking points off of your health counter. If this reaches zero, it's goodbye cruel world or GAME OVER, depending on how you want to look at it.

Other hazards are presented by the maze itself. The dungeon is full of the likes of locked doors (which need keys to open) and both false and disappearing walls. But making the escape attempt a bit more rewarding are the masses of treasure chests found around the maze. Simply by blasting them open you reveal the goods, which are collected on contact. Other goodies, in the form of potions and power-ups are also located around the labyrinthine passages.

There are countless other mysteries to be uncovered in the Gauntlet II dungeon. The question is, will you survive long enough to solve them all and make good your escape?

## COMMENT

What a great conversion! All of the arcade features have been squeezed into this Gameboy version, even down to the speech! Gauntlet II is instantly recommended, although you'll have plenty more fun if you can persuade a mate to buy the game and thus take part in some dual-player thrills and spills!

RICH

## TWO-PLAYER THRILLS

Although Gameboy Gauntlet II can't deal with four players simultaneously like the Atari coin-op, two players can link up their Gameboys and indulge in simultaneous two-player action. This does have an advantage over the coin-op though as you both aren't restricted to the same screen, so you're free to wander off as you please!

## COMMENT

Somehow, the programmers of this conversion have packed in all the graphics, sound effects, speech and playability of the coin-op! The end result is stunning - a black and white mini-epic of the original arcade machine! The action is addictive and fun, even more so with two players where you can both wander about independently! If you're a Gameboy owner, Gauntlet II is a must.

JULIAN

## GAUNTLET II

PLAYABILITY	90%
LASTABILITY	88%
OVERALL	88%

## MEET THE GANG

**THOR:** This warrior type has excellent shot power and good armour, but his magic is a tad lacking.

**MERLIN:** His awesome mystical abilities give him great shot power and magical prowess, but he is naked in the armour department.

**QUESTOR:** This elf is fast on his feet, with good magical abilities. However, his armour and shot powers are only average.

**THYRA:** Thyra's Valkyria shield absorbs a lot of damage and her magic smart bomb is good too. Fast on her feet, only her shot power lets her down.

# HOT LINES

## WIN A SUPER NES

The Super Famicom is simply the greatest gaming tool in the universe! And there's one up for grabs on this red-hot phone line. You know the score. Dial away and see if you can win.

**0839 335523**

## WIN A GAME GEAR

Fancy trying to win one of those portable, colour Game Gear doubles? Dial up the number above and listen, and you never know. One of those fabbo machines could all be yours!

**0839 335526**

## WIN A MEGADRIVE

If you've always wanted a Megadrive but have parents who're too stingy to buy one, why not try and win one in this amazingly easy-to-enter comp. Cerees the knobs on your phone, dial and listen...

**0839 335524**

## WIN A GAMEBOY

What's hard, six inches long and is great fun to play with in the toilet? A Gameboy of course! It's the greatest thing since dusted monkey ass, and one of these pocket-sized wonders could be yours if you win the comp on this line.

**0839 335527**

## WIN £150 WORTH OF GAMES

IF YOU'RE UNDER 18, PLEASE MAKE SURE YOU HAVE THE PERMISSION OF WHOEVER PAYS YOUR PHONE BILL BEFORE YOU DIAL. ALL CALLS ARE CHARGED AT 33p PER MINUTE (CHEAP RATE) OR 44p (ALL OTHER TIMES). NO PROGRAMME IS LONGER THAN THREE MINUTES. ALL PROGRAMMES ARE OPERATED BY BROADSYSTEMS LTD.

It's the year 55 BC and the Roman empire is in complete control of all Europe, save for one tiny Gaulish village. Despite all Roman attempts to capture this area, it still remains free and independent under the leadership of Chief Vitalstatix.

The reason for the extraordinary record of hardness is the magic strength-giving potion brewed up by the venerable druid Getalix. When the Gauls swig this elixir, it allows them to dust anyone who gets in their way!

Being wise to this, top Roman geezer Julius Caesar has decreed that the druid be captured and transported to the Italian capital to make the potion for the Roman forces, making them unstoppable in their quest for total world domination.

So it came to pass one fateful day as Getalix was gathering herbs alone in the forest that he was indeed captured and taken to Rome with the express intention of transforming even the most pathetic example of legionaryhood into a humen killing machine.

This is where you come in. As Asterix and Obelix, the village's herdet men, you must undertake a quest of many platform levels, dodging hazards, negotiating underwater sections and bawling Romans senseless with your combat skills and special items which can be picked up along the way. Should the pair fail to reach Rome and rescue the druid, slavery is assured for our French boar-loving chums.

▲ Airborne liquid is lethal to our Asterix, so watch out!

## COMMENT

Asterix is yet another example of an excellent Master System platform game, just like Mickey Mouse, Sonic and Donald Duck. In fact, it's perhaps just a little too much like these games for my liking. There's the usual bottom bounce manoeuvre used to dispose of the meanies, and chucking your

## RICH

bombs/menhir/potions about is just like throwing a rock in Mickey Mouse. Even some of the ideas behind the levels are taxed directly from the Disney cineals. However, originality grips apart I found Asterix a particularly entertaining piece of software. The character switching for each level is quite good and I like the way that each stage is subtly altered to make it possible for each character to complete it. There is also plenty of variety between each level, making it a very compulsive game. What I don't really like about the game is the infinite amount of continuos available. I reckon that experienced platform gamers could probably finish the game in one sitting. If it's a fab platform game you want, I'd recommend Donald Duck over this, but if you've got that, take a peek at this.

## TWOPLAYERTACTIX

As anyone who's ever read any Asterix books will know, Asterix and Obelix are inseparable. This means there's no splitting them up, even in a one-player game! If there's just you, each level must be completed twice (although it does differ slightly the second time), once as Asterix and once as Obelix. If a friend is playing, you can relax after completing a level as he or she takes the part of the second half of the

SEGA

REVIEW

# erix

## HEFTI BONUS

Asterix and Obelix's jaunt into the jaws of death is not just your standard mission to save a close friend and a rebel village! It's also a way for the lads to earn some spare cash. Destructible blocks and even more destructible legionnaires litter the landscape. Bashing these yields much in the way of gold coins, from a single sestertius to a whole bagful of shiny coinettes! Not only this, but life-giving food and points-granting bonuses such as amphores can also be found with this method!

## SECRET TRIX

Though the primary concern of the duo is getting straight to Rome and rescuing Getafix, it does indeed pay to explore. Hidden in parts of the scenery are routes to secret rooms which contain many bonus-related delights. One particularly good example is found in level two. After swimming down a particular pool it's possible to penetrate the wall of rock on one side at a certain point. Do this and a cavern is found in which resides a jug packed full of bonuses!

▲ Some interesting objects here, eh?

## ATTACKSTATISTIX

It's a sad thing that Getatix was fresh out of magic potion when he was captured. This makes our heroes' quest somewhat more difficult. Luckily, the druid was able to whip up a much simpler potion in his prison wagon and he has scattered cauldrons of this throughout the game. Asterix can use bottles of this concoction in a similar way to grenades. After being thrown, the mixture bubbles for a few seconds before exploding, destroying any enemies or destructible sections of scenery in the vicinity. Obelix (who fell into a cauldron of potion when a baby and as a result is permanently super-strong) prefers a much more direct method of attack. The fat one throws huge menhirs which, quite unapologetically, crushingly demolish their targets.

## ASTERIX

## OBELIX

▲ Asterix faces up to the boss and his deadly bees!

## COMMENT

First Impressions of Asterix are most favourable. The graphics are top-notch and the sprites closely resemble their comic counterparts. The game is also very playable to start with. The action is fast and there's a lot of secret rooms and bonuses to discover. Some of the puzzles found even in the early levels are pretty taxing, but can be solved with a bit of thought and trial-and-error. The only real flaw with Asterix is that there are too many places where one single mistake results in the loss of a life with no second chance to save yourself, such as one level which constantly scrolls; got caught against the side of the screen and it's curtains! Don't get me wrong, Asterix is a great game, but be warned - it can be very frustrating at times.

# PAPER

As the Paperboy first appeared in the arcade nearly seven years ago, and cast you as a paper-deliverer whose round takes him to the very strongest parts of town. In this Megadrive conversion, all of the original coin-op's features have been included as you battle against the odds to get your papers delivered.

At the start of the game there are three streets to choose from, effectively giving three difficulty levels. Each level is split into seven sub-levels, each of which represents a day of the week. The object is simply to survive until Sunday.

At the beginning of each round you're shown a map of your delivery route. You must deliver papers to every subscriber, by throwing them into their mailboxes or on their doorsteps as you cycle past.

Non-subscribers should be treated with the contempt they deserve, so throw spare papers through their windows and ride all over their nice flower beds for bonus points.

If you fail to deliver a paper to a subscriber, he cancels his subscription - a perfect round of deliveries, however, results in new customers!

Things are complicated by the presence of various obstacles such as lawn mowers, buggies, cassette players, and even ghosts! If you hit any of these, a life is lost - so careful with those handlebars.

## THREE ROADS TO SUCCESS

At the start of each game the player gets the choice of three different routes: Easy, Medium or Hard Street. Obviously Easy Street is where beginners should practice their skills. On Medium Street things start to get hard, but to compensate, scoring is doubled. Those chasing a really high score should tackle Hard Street, where triple score awaits.

# BOY

MEGADRIVE

REVIEW

牛年集

## THE ORIGINAL COIN-OP

The original Atari coin-op appeared in early 1985 and wowed arcade goers with its combination of great graphics, sampled speech and unusual handlebar controls. However, it had a bug - right at the end of the bonus round, cycling between the grandstand and the fence sent the scoring system crazy and you'd end up with well over a billion points!

10,200 BONUS 1050

▲ A perfect delivery here!

## COMMENT

rrrgg-mahl  
Paperboy scores top marks in the truestretton stakes owing to two incredibly irritating factors. First of all, the collision detection is exceptionally dodgy, resulting in lots of unobscured and very unfair trips to the cemetery.

## RICH

Secondly, the control method is just plain stupid. Control of the bike seems to pivot around the back wheel, making for very unresponsive and unreluctant gameplay. Other than those two factors, Paperboy remains quite faithful to the coin-op with backdrop graphics that mimic the coin-op adequately and loads of great sampled sound. Some of the sprites (like your bike) seem a bit ropey around the edges, but otherwise this conversion looks and sounds just like the real thing. This game is obviously a good buy for fans of the original, but I felt that ultimately it was just too annoying to make it much fun at all.

## ACCURATE DELIVERY

Slinging a paper at a customer's front door is enough to count as a delivery, but skillful paperboys throw papers right into their mailbox, which results in a 250 point bonus!

455 BONUS 240

## NEIGHBOURS

Paperboy's paper round takes him through a typical 1985 neighbourhood. Deadly spinning brookdancers rotate to the crazy beat of their ghottoblasters, cars reverse into his path, roadworkers are hazards to avoid, as are mad cats, bonkers dogs, radio controlled vehicles and inebriated pedestrians!

# MEGADRIVE

# REVIEW

## COMMENT

With its crisp graphics and great tunes, this conversion looks and sounds identical to the original coin-op classic. However, it falls down on its playability due to

### JULIAN

very poor bike handling and half collision detection. For a start, the response to the joypad is sluggish, but more importantly the game suffers from the same irritating and unrealistic "rear wheel steer" that plagued computer and Lynx versions of the game. Basically the bike pivots from its rear tyre rather than turning using the front wheel like it did in the original arcade game, which makes a precise control very difficult. The programmers of the superb Master System version avoided this problem, so it's annoying to see it rear its ugly head here. The aforementioned collision detection is just plain frustrating - the bike often hits things you think you've avoided, and then sails unscathed through what looks like a fatal collision. If these flaws had been removed, this would have been a perfect conversion. But they haven't, and the result is a disappointing game which you get the feeling could easily have been so much better.

▲ Even the roads have lethal obstacles.

▲ Anachronistic automobiles abound!

## SMASH, TRASH 'N' MASH

The houses of non-customers should be treated with the contempt they deserve, so sling papers through their windows, ride across their lawns, squash their flower beds and do your utmost to cause as much damage as possible. Not only is this fun - you get bonus points too!

## BONUS BONANZA

At the end of each day, Paperboy gets the chance to show off his BMX-ing skills on the training ground. There are targets to throw papers at as well as jumps to negotiate. If Paperboy reaches the end of the course, he's awarded a big points bonus!

**PRICE: £34.99**

## PRESENTATION 82%

Great presentation throughout, with arcade-quality intermission screens and comprehensive difficulty settings

## GRAPHICS 83%

Crisp and clear sprites and bright backgrounds make this look just like the original machine

## SOUND 84%

Again, accurately reflects its arcade counterpart

## PLAYABILITY 76%

Annoying controls and irritating collision detection makes this frustrating from the outset

## LASTABILITY 65%

There are plenty of levels to conquer, but only those willing to persevere in the face of frustration will keep playing

## OVERALL 72%

A potentially superb coin-op conversion which is sadly let down by two very annoying gameplay flaws

# ALIEN STORM

All the humans were trying to do was come in peace and harmony, and enjoy their lives to the full, and they would have got away with it, it wasn't for those meddling aliens.

Strangely, loaded with sleek, conspicuous slimy extraterrestrials have landed onto the ghastly inhabitants have taken over, torching the population and generally dropping the insipid, jobbo-edge fashion.

Fortunately there are two brave souls (or still) willing to fight for the human cause. They are Gordon the hamburger guano mutant and Scooter the robot assassin who have decided to take on these vile beasts second rate their bases the skies. (It's so heavy) decide.

In Alien Storm, a conversion of Sega's popular arcade game, the action is seen in a three-quarter side view, giving the screen depth that the players seem to move in and out. Blasting aliens whilst keeping a sharp eye on bullets and enemy power-ups is the order of the day here, so get your joystick blasting aliens whilst keeping an eye on any big alien energy gauges, too. Well, do and get slaughtered.

▲ Scooter the android in action. This Terminator-like machine has many incredible weapons built into his hyper alloy body, including this amazing finger blaster. Cor!

## SHOPPING FOR ALIENS

Once you level the heroes enter an alien market, shop to participate in 3D Open World. Worth a list of gratuitous violence. The object is simply to blast everything in sight, including the store's mutant stock. Enemies contain extra energy and weapons. (It's so heavy) Well, do.

▲ Blast, blast, and blast some nice to the most points out of this alien market strolling device.

▲ Here, Gordon is surrounded by nasty aliens.

## EVER FEEL LASERS

If you are tired of shooting your way through all over the place with only a few enemies to kill, then you should try Alien Storm. You can choose to play as Scooter or Gordon, both of whom are powered by batteries. Scooter's main weapon is a laser pointer. Gordon's main weapon is a blaster. Both characters can be upgraded by collecting alien energy. Scooter's blaster can be upgraded to a laser pointer. Gordon's blaster can be upgraded to a laser pointer. Both characters can be upgraded by collecting alien energy. Scooter's blaster can be upgraded to a laser pointer. Gordon's blaster can be upgraded to a laser pointer. Both characters can be upgraded by collecting alien energy.

## SONIC BOOM

Another change in the station is a hybrid bike during the game. This time, we add our hero's goggles to along the station as usual, but the goggles provide more benefits. So it's a

Hybrid bike. During the level, our hero's goggles provide a variety of benefits. In the game, the hero's goggles provide a variety of benefits. In the game, the hero's goggles provide a variety of benefits.

## SONIC DESTRUCTION

Hybrid bike. During the level, our hero's goggles provide a variety of benefits. In the game, the hero's goggles provide a variety of benefits.

▲ Gordon's mega-destructive short-range laser cannon is just the job for taking on slimy aliens like this one. He also carries laser pistols to get the job done.

## COMMENT

I can only express deep disappointment at this shoddy conversion. It's an instant downer as soon as you boot it up - the graphics are very poor, with small, blocky and poorly-animated sprites. The aliens are particularly bad, looking nothing like their grisly arcade counterparts. The sound is even worse, with a vile, grating, screeching tune that has you reaching for the volume knob in seconds. But worst of all is the playability. Even with its cock-eyed collision detection and unresponsive controls you can finish the game within a couple of sessions - Alien Breeze would be a more befitting title for this game!

## JULIAN

## COMMENT

Bearing in mind the excellent conversion job made of the Megadrive version of Alien Storm (except for the difficulty level) it would have been nice to think that Sega could pull a similar conversion rabbit out of the hat when it came to the Master System version. Sadly it's not to be. Alien Storm is lacking in three areas: graphics, sound and playability. The sprites are small, blocky,

## RAD

poorly animated and few of the aliens resemble their arcade counterparts in any way. The sound is dreadful, with one or two barely audible 'effects' and what must be the worst Master System tune ever, it sounds like the Tons Desol Memorial Quartet on their kazooes and Muppet keyboards. The final nails in the coffin are the unresponsive controls and poor collision detection. It's difficult to make your character shoot accurately due to the poor 3D, and aliens who should rightly be about six feet away from you suddenly kill you. Quite simply, Alien Storm is a very unsuccessful conversion that fails to deliver any of the thrills and spills of the original coin-op.

BY: SEGA

# THE GAMES WINTER CHALLENGE

Snow and ice evoke different reactions from people. While some people tend to shiver, wheeze and slip over a lot in these unfavourable conditions, others strap on special equipment or climb aboard sled-like contrivances and participate in snow-based sporting activities.

Not surprisingly, *The Games* concentrates on the sporting aspects of cold weather and casts the player and his pals if they want to participate in multi-player excitement as athletes hoping to scoop the gold medals in the eight-event Winter Challenge. The overall aim is to win enough medals in each event to be declared the overall winner of the challenge, and thus bask in glory ever-lasting (or something).

But no-one expects your first outings on the Winter Challenge course to be completely glorious. That's why the programmers of the game have included a special practise option which enables you to test out each event before the competition begins, and maybe even hone a few skills in preparation for the main events!

## SPEED SKATING

Compared to the other events, *Speed Skating* is definitely the simplest. Just tap the seven shades out of your joyed buttons to increase your skater's speed and watch out for the walls on each turn. Easy! Just complete three laps of the circuit and you're home and dry (well, hems any way).

## DOWNHILL

Grab your skis and sticks and ready yourself for some intense action! Avoid the sides of the valley and keep your skier speeding between the gates to get plenty of lovely points. The winner is the skier with the fastest time.

## LUGE

Jump atop a tiny snow sled and speed around a course of dug-out ice tunnels as quickly as possible. Use the outside of the tunnels to build up the highest possible top speed - but be careful that you don't lose control!

### JULIAN

The inconsistent quality of the graphics and dreadful music don't give this instant appeal, but the more you play it, the more you get into the snow-bound action. The events are varied and fun to play, and while some might complain that they're easy to finish, the real challenge is beating your own personal records. The multi-player mode is where the game is best appreciated, and I like the replay option which comes in handy both as a tool for assessing your own gameplay style as well as a Beavis-esque left-a-minute device for displaying your fellow player's major foul-ups in super slow motion! If you're after some enjoyable sporting action *The Games: Winter Challenge* comes highly recommended.

# GAMES: CHALLENGE

## CROSS COUNTRY

Endurance is the key in mastering this grueling event. Match your skang strokes with the energy meter at the bottom of the screen to stay at the optimum speed. Only then have you a sporting chance of finishing this energy-draining long distance event.

▲ The fab opening ceremony.

▲ Taking to the air in the Ski Jump!

## GIANT SLALOM

This is much the same as the Downhill event, but plenty of swerving skills are required to successfully negotiate each gate. The course is also longer (hence the "giant" of the title).

## BIATHLON

Biathlon is a mixture of Cross Country and shooting. Just ski to each of the five targets around the course and let rip with your rifle. Inaccurate shooting leads to penalty seconds being added to your time. The winner is the contestant with the lowest time.

## BOBSLED

This event is almost exactly the same as the Luge, but the Bobsled is a tad more difficult to control (owing to its bulkier size). The Bobbed ice tunnel course is also a lot longer and twistier than the Luge's, so keep your wits about you!

REVIEW

SKI JUMP

Clip on your skis and shoot off the end of an ice-covered ramp in this potentially lethal event. Minimise your wind resistance while in the air and successfully land to finish the event. The winner is the one who...  
 1. wins 2. loses 3. also 4. su...

COMMENT

This is reminiscent of the computer Epyx Games series in name and presentation only. Rather than produce polished sprites and backdrops for each event, the programmers have opted for fast-moving tiled-in 3D graphics with sprites overlaid. This works extremely well for just about every event, although the update slows down when there's plenty of on-screen action. The sound is a

mixed bag, with some great examples and truly diabolical music. Gameplay-wise, there's no denying that The Games: Winter Challenge is varied and engrossing. Although each event is pretty easy to complete, actually mastering each to an expert degree should make for a long-lasting game. Add in the multi-player angle and you've got a great competitive experience as well. Although not exactly a classic, The Games: Winter Challenge will appeal to anyone after a decent sports game - a genre rather lacking on the Megadrive at the moment.

▼ Here's some of the competition lined up for you in the actual tournament!

IT'LL BE ALRIGHT ON THE NIGHT

Every time you finish an event, The Games: Winter Challenge allows you to survey your performance step-by-step, by using the Instant Replay option. The VCR-like controls make it simple to study every aspect of your performance - including the bits where you completely cock it up!

▲ The Bobbed event begins!

▲ The first difficult corner is handled with ease.

▲ Coming up to the bridge!

▲ The sharp corner of all...

▼ And they've spooned it! What a wipe-out!

THE GAMES

WINTER CHALLENGE

BY: BALLISTIC  
 PRICE: £39.99

RELEASE DATE: TBA  
 GAME DIFFICULTY: EASY  
 LIVES: 1  
 CONTINUES: N/A  
 SKILL LEVELS: 1  
 RESPONSIVENESS: SPEEDY

PRESENTATION 88%

Well-presented on the whole, with training options and instant replay action

GRAPHICS 81%

Pretty decent tiled-in 3D graphics for the landscape, with main sprites that vary from okay to great.

SOUND 77%

Some extremely awful music, but there's great sampled effects.

PLAYABILITY 87%

Each event is good fun to play, it's a little easy to complete.

LASTABILITY 84%

Completing each event is pretty easy, but mastering them to an expert degree should take some time.

OVERALL 85%

A great multi-event, ice-based extravaganza, highly recommended to sports fans.

Following the nuclear disaster known as Judgment Day, a terrible war raged between the mechanised forces of the Skynet defence computer and the entire surviving human race. However, one man - John Connor, managed to band the survivors together and lead the human forces to almost complete victory. In response, Skynet targets Connor for termination and sends a deadly T-1000 cyborg back in time to kill him when he is still a ten year-old child - and thus win the war before it even begins! Luckily, the human forces get wind of this plot, steal a model 101 Terminator, reprogram him to protect John and send him back in time to do battle with the T-1000.

Before this can be done, Skynet defences around their time machine must be destroyed allowing the chrono-spanning jaunt to take place. This is done by John himself in the first level of the T2 game. This side-on platform blast sees John blowing up defence coordination towers to infiltrate the Skynet base. The theme is carried over to level two, where the production plant must be penetrated to grab your own Terminator. The captured machine receives its new orders in level three. This is a puzzle section, where John Connor adjusts the circuitry in the Terminator's brain.

Level four takes place in 1994, where John and the Terminator must escape from the T-1000 who is chasing after their motorbike in a large truck. Shooting the lorry and avoiding hazards are the orders of the day here. In level five, the Cyberdyne Systems lab must be blown up to stop Skynet from ever being created. After Cyberdyne has been successfully disposed of, our heroic cyborg must blow away the rampaging T-1000. This comes to pass in the climactic level six, set within the confines of a steel mill. Here, the Terminator grabs weapons which fell from the ceiling and uses them to blast the T-1000 into a big vat of molten metal from which he will never return.

**T-1000 TOMFOOLERY**

This T-1000 is no ordinary killer cyborg as it can change his shape at will and even flew like mercury. This process is seen in action on level six. Damage the T-1000 enough and it sheds his human appearance for good and turns into a liquid psychopath of doom! Make sure you keep plenty of heavy artillery around when this happens.

▲ The T-1000 in action!

**TERMINATOR  
JUDGEMENT**

**COMMENT**

Boasting excellent graphics, awesome soundtracks and decent playability, Terminator 2 is one of the best Gameboy carts I've played of late. Every level is challenging and enjoyable, and it should keep you occupied for weeks. Highly recommended.

**RICH**

▲ Here's the Terminator's targeting system in action. Impressive, eh?

▲ Meet Skynet's guardian!

▲ The T-1000's very angry!

▲ Circuit board action! Match up those terminals!

TERMINATOR 2  
JUDGMENT DAY

PERPLEXING PUZZLES

In these puzzle stages, the object is to clear four electrical paths for charges that pass from the bottom to the top of the screen. There's a strict time limit to set the paths up in so hurry!

▲ In this movie shot, the T-1000 walks away undamaged from its first encounter with the Terminator.

COMMENT

RAD

Terminator 2 is one of the best Gameboy releases in some time. The levels differ enough to give the game variety but not so much that the action becomes disjointed. The gameplay is also of a high standard and the cart packs quite a challenge. There's no faulting the graphics either with loads of great sprites, backgrounds and animation, and the whole thing is accompanied by some topper effects and tunes. Action-loving Gameboy owners should get this now.

Got something to sell? Or want to swap games? Do you want something, or do you have a special message? Perhaps you just want a pen pal? Well, whatever you want, the MEAN MACHINES Megamart is the place for you.

For just £1.00 you can have your very own advertisement containing up to 20 words! Or if you're feeling rich and verbose (look it up in the dictionary), £2.00 will buy you 40 (count 'em) words!!

So what are you waiting for? Fill in the squares below with your words, pop it in an envelope along with a cheque or postal order made payable to MEAN MACHINES and send it to:  
MEAN MACHINES MEGAMART,

MEAN MACHINES, PRIORY COURT,  
30-32 FARRINGDON LANE, LONDON,  
EC1R 3AU.

**ATTENTION!**

MEAN MACHINES Megamart is for private advertisers only. Anybody sending in a trade advert will not have it published. It will be ignored, your cheque will not be cashed and no correspondence will be entered into! - However if you are interested in placing a lineage trade ad please contact Martha on 071-251 6222 NOW!

Due to deadlines, allow up to six weeks for your advert to appear in the magazine.

HOT CONSOLE GAMES COMING SOON...HOT CONSOLE GAMES COMING SOON...

## HOME ALONE

Those Wet Bandits are at it again, plundering the homes of innocent rich people everywhere. Having paid their debt to society following the last series of hilarious scrapes seen in the film Home Alone, Harry and Marv have recruited some new gang members and are once again attempting to get their hands on the McAllister riches - and on the throat of young Kevin McAllister, the cheeky young scamp who landed them in the jug last time! You take control of young Kev, who muncas around the family's masive mansion grabbing the family jewels and depositing them in the safe. From what we've seen of the American version of Home Alone, this game is a sad shambles of an effort with forlorn, ungantly graphics and pitiful, booming soundtracks. The gameplay is tedious to the extreme with lumbering, cack-handed controls and inept, bungling collision detection. The baddies are the most arthritic baboon-like creatures yet witnessed in a video game, easily dispatched with a few squirts from your water pistol (?)

Some evil forest villain has kidnapped all your wildfire pals, so it looks like you'll have to get your best platform flippers on and rescue them in your own inimitable froggy atyle. Super Wagon Land is a horizontally scrolling platform game with a pseudo-3D perspective to make things a bit more interesting. To spice events up a bit further, your arch-woodland nemesis won't hand over any of your pals until you successfully participate in a shape-matching or mathematical game! If you'd like to brush up on shape recognition whilst playing platform games, Super Wagon Land is one cart you may have trouble containing yourself over.

## SUPER FAMICOM

## Radical Psycho Machine RACING

Just released in America is RPM Racing, a tweaked version of Racing Destruction Set, an old Electronic Arts C64 title! It's a one or two-player split screen racing game in which you drive your own Radical Psycho Machine (the RPM of the title). Many of the game's parameters can be set (including the strength of gravity) and you can customize care and design and save your own tracks! It's a fun game, and we'll be taking a closer look at it very shortly.

## SUPER FAMICOM

1-2  
PLAYERS

## F1 GRAND PRIX

中嶋 悟 監督

A tweaked version of the fun-packed Checkered Flag coin-op, this overhead view racer throws you in at the deep end - as a newcomer hoping to make your way up to the top of the world circuit. Whether you can do this not only depends on your racing skills but also on your design ability too. You have complete control over the make-up of your car, including the power of the brakes, the responsiveness of the steering and even the angle of the aenions! It's a tough game, but has enormous lasting appeal thanks to the vast number of tracks, comprehensive options and high difficulty level.

## GHOSTBUSTERS II

The film might have been and gone a million years ago, but the spirit of comedy adventure lives on in a soon-to-be-released Gameboy maze-cum-shoot 'em up title. This casts you as the two Ghostbusters of your choice on a mission to save the world from a huge influx of spooks. One of the team shoots the ghosts, and the other traps them in their magic trouser turn-ups. Bust your quota of ghosts and bit by bit, the city is made a safer place to live in. Then it's on to the final showdown with Gorza the God and Mr Stay Puft the marshmallow man in a climatic finale. Ghostbusters looks pretty good - watch out for a review in a future issue of this very mag

## DOUBLE DRAGON

# 双截龍

*The Revenge*

Join Billy and Jimmy on a kung-fu quest for justice in Double Dragon II, the Megadrive conversion of the pensionable arcade machine. Mr Big, top class crim type has shot Billy and Jimmy's girlfriend dead for a laugh. The only problem is that the Dragon brothers can't take a joke, and are out for revenge. Although it's a popular arcade game, we couldn't help but be disappointed with the import copy currently doing the rounds. It's quite fun, but the graphics are poor and it lacks the thrills 'n' spills of Streets of Rage. Look out for a review in a forthcoming issue.

## GAME BOY

## MEGADRIVE

## NINJA GAIDEN

Ninja Gaiden has enjoyed some acclaim and popularity on the NES under its new title of Shadow Warrior. Now you can enjoy the many thrills of this superb Ninja game wherever you go, because it's leapt over in a shadowy concealed sort of way to Sega's pocket wonder, the Game Gear. You are Ryu, a man on a mission which involves travelling the world demolishing the crime empire of the evil overlord responsible for your father's death. Ninja Gaiden looks like a bundle of fun and is certainly one for GG owners to grab.

## GAME BOY

An import copy of Super NES Lemmings has just arrived in the office, and we're very impressed. It's basically identical to the Amiga version and provides much eddective fun and frolics as you guide your army of Lemmings safely around the platform scenery and save them from a horrible agonising death. "But", we hear you cry, "you previewed that last month". Yes indeed! The reason why we're dredging those creatures up again is because we've got pics of the Megadrive version. As you can see from the pictures, it's almost identical to the Super NES version - if the gameplay is also the same, which there's no reason for it not to be, it'll be a cracker!

# MISSION: IMPOSSIBLE™

This is your mission.  
Take over!

Terrorists have kidnapped ingenious Dr. "O". And taken charge of his computerized defence system. Now they are threatening worldwide devastation. You and your three secret agents must stop them. With helicopters, speedboats and fast cars. Up in the Alps. On Cyprus. Through the streets of Moscow. Down the canals of Venice.

Mission: Impossible.  
MegaVideoGameFun  
from KONAMI.

KONAMI has even more top hits for the Nintendo Entertainment System™.

Teenage Mutant Hero Turtles II,  
Roller Games and Top Gun –  
The Second Mission.  
Go get them now!
